## **1. INTRODUCTION**

### **1.1 PURPOSE**

The purpose of a Software Requirements Specification (SRS) document for the e-Munakahat system is to define the features and requirements clearly and concisely for the system, as well as constraints and assumptions. This serves as a guide for the development team and stakeholders to understand the project's scope and objectives and ensure that the final product meets the needs of the users and the jurisdiction.

This document will provide a clear understanding of the system requirements, including the system attributes and all other system requirements. This will help the development team to identify and understand the requirements that need to be implemented in the system. It will also help the stakeholders to understand the system's capabilities and limitations, and how it will meet their needs. This will help the development team to identify any potential issues and constraints that may arise during the development process and to plan accordingly.

The SRS document will also serve as a reference point for the stakeholders throughout the development process. It will also help the stakeholders to understand any limitations or assumptions that may impact the system's performance or usability, which will help the stakeholders to make informed decisions and better plan for the project. This will also help to ensure that the final product meets the needs of the users and the jurisdiction.

## 1.2 SYSTEM IDENTIFICATION

The Software Requirement Specification (SRS) belongs to the “e-Munakahat System” (EMUN).

Table 1.1 Document Identity.

System title	e-Munakahat System										
System abbreviation	EMUN										
System identification number	QUC000001-001										
System version number	1.0.22 This is the current release for the e-Munakahat system.										
System release number	1.0.23 Starting with number 1 at the major release shows that this system is initially released to the user. Number 23 at the service release shows that this system is expected to be released in 2023.										
Document Identification ID	SRS-EMUN-001 Meanings for terms use: <table border="1"> <tr> <td>SRS</td><td>Software Requirement Specification</td></tr> <tr> <td>EMUN</td><td>e-Munakahat System (System name)</td></tr> <tr> <td>001</td><td>Document release number</td></tr> </table>	SRS	Software Requirement Specification	EMUN	e-Munakahat System (System name)	001	Document release number

001	Document release number										

### **1.3 SYSTEM OVERVIEW**

Our system is a web-based system to support the Pahang Wedding management system. The purpose of the system is to provide a solution for managing wedding registration and operations efficiently. Users can use this system for marriage registration and information retrieval. It also eases the government to collect granular data on weddings in Pahang and store the information for future use. This system is handled by the Quantum Corp company. This system contains various functionalities such as user registration, marriage application, marriage registration, marriage preparation course, proof of payment, request for marriage, marriage card, marriage consultation, and special incentives for the bride and groom.

There are five modules in this system which are:

1. Registration and handle user profile

The initial stage in using the system is applicant registration, which is required for the applicants to enter the system. The admin will register the staff through the database. It contains private information like an Identity Card number, phone number, email address and password. Because registration is based on the user's IC number, a unique number with no duplicates, each user has just one account for the system. Once the registration is successful for the users, they can log in to get access to the system contents after completing the registration process. The system also allows users to modify their profile details to update their details.

2. Attend the marriage preparation course with proof of payment and to request a marriage.

A consultation module in a marriage registration system is a feature that allows individuals to request and schedule appointments with a marriage registration officer or other staff members to obtain information or assistance with the marriage registration process. This module would typically include a calendar or scheduling system to manage the availability of staff members and the appointments that have been requested. It may also include a form or other mechanism for individuals to request appointments and any necessary information about the individuals requesting the appointments (such as their contact details). The consultation module may also include functionality for staff members to view and manage their appointments and to record notes or other information about the consultations that have taken place. The applicant applies for a consultation session, and the staff approves the application, schedules the session time, and assigns an advisor for the session. Then the staff record the applicant's attendance and spouse as well.

3. An application to register a marriage within or outside the country, as well as a voluntary marriage, and to produce the marriage card or certificate with proof of payment

Marriage registration is split into two processes which are voluntary and authorized registration. User needs to pass a pre-marriage course to be able to register their marriage. Voluntary registration is for the older generation who live far away from town and did not register when they married. For authorized registration, the user must prepare various forms and information in which the template is provided in the system. After staff from JAIP has approved the marriage registration, it will notify the user so that they know their marriage registration has been approved.

4. Register for a marriage consultation with a service advisor.

A consultation module in a marriage registration system is a feature that allows individuals to request and schedule appointments with a marriage registration officer or other staff members to obtain information or assistance with the marriage registration process. This module would typically include a calendar or scheduling system to manage the availability of staff members and the appointments that have been requested. It may also include a form or other mechanism for individuals to request appointments and any necessary information about the individuals requesting the appointments (such as their contact details). The consultation module may also include functionality for staff members to view and manage their appointments and to record notes or other information about the consultations that have taken place. The applicant applies for a consultation session, and the staff approves the application, schedules the session time, and assigns an advisor for the session. Then the staff record the applicant's attendance and spouse as well.

5. Application for special incentive for the bride and groom

The marriage registration system features a special incentive module that enables users to apply for incentives, provided they meet the necessary prerequisites. This module allows individuals to input their personal information and upload necessary documents, making the process more streamlined. Additionally, the staff side of the platform allows for the review of applications and ensures that the process is efficient and user-friendly. The special incentive module in the marriage registration system also includes a notification feature that keeps applicants informed about the status of their application. Once the staff reviews the application, the applicant will receive a notification, either confirming their approval or outlining the reasons for denial. This ensures that applicants are aware of the status of their application in a timely and efficient manner."

## **2. PRODUCT DESCRIPTION**

---

### **2.1 Product Perspective**

From a product perspective, the e-Munakahat system is an online marriage registration system that is designed to automate and streamline the process of registering and managing Muslim marriages in the state of Pahang in Malaysia. It aims to provide a user-friendly and efficient way for individuals to register for marriages, schedule appointments and pre-marriage courses provided by the government. The system will also provide the user with the ability to search for registered marriages, view and print marriage certificates, and access related forms and information.

The system is also designed to provide robust data management and reporting capabilities to support the needs of government officials and staff members responsible for managing marriages. It will provide the administrator with the ability to manage and monitor the system, as well as generate reports based on the collected data. This will allow for better decision-making and process improvements.

To accomplish the system operation of the e-Munakahat system, there is a web-based interface for the users, who are citizens living in Pahang, the system administrator, and JAIP staff. This will provide the user with the ability to access the system from anywhere and at any time.

Figure 2.1.1 shows the context diagram of the e-Munakahat system. This figure shows a general context of the e-Munakahat system functions. This system has four external entities: Applicant, Advisor, Spouse and JAIP staff. Each of these entities has important contribution to this system.

# SOFTWARE REQUIREMENT SPECIFICATION (SRS)

## 2.2 Product Functions

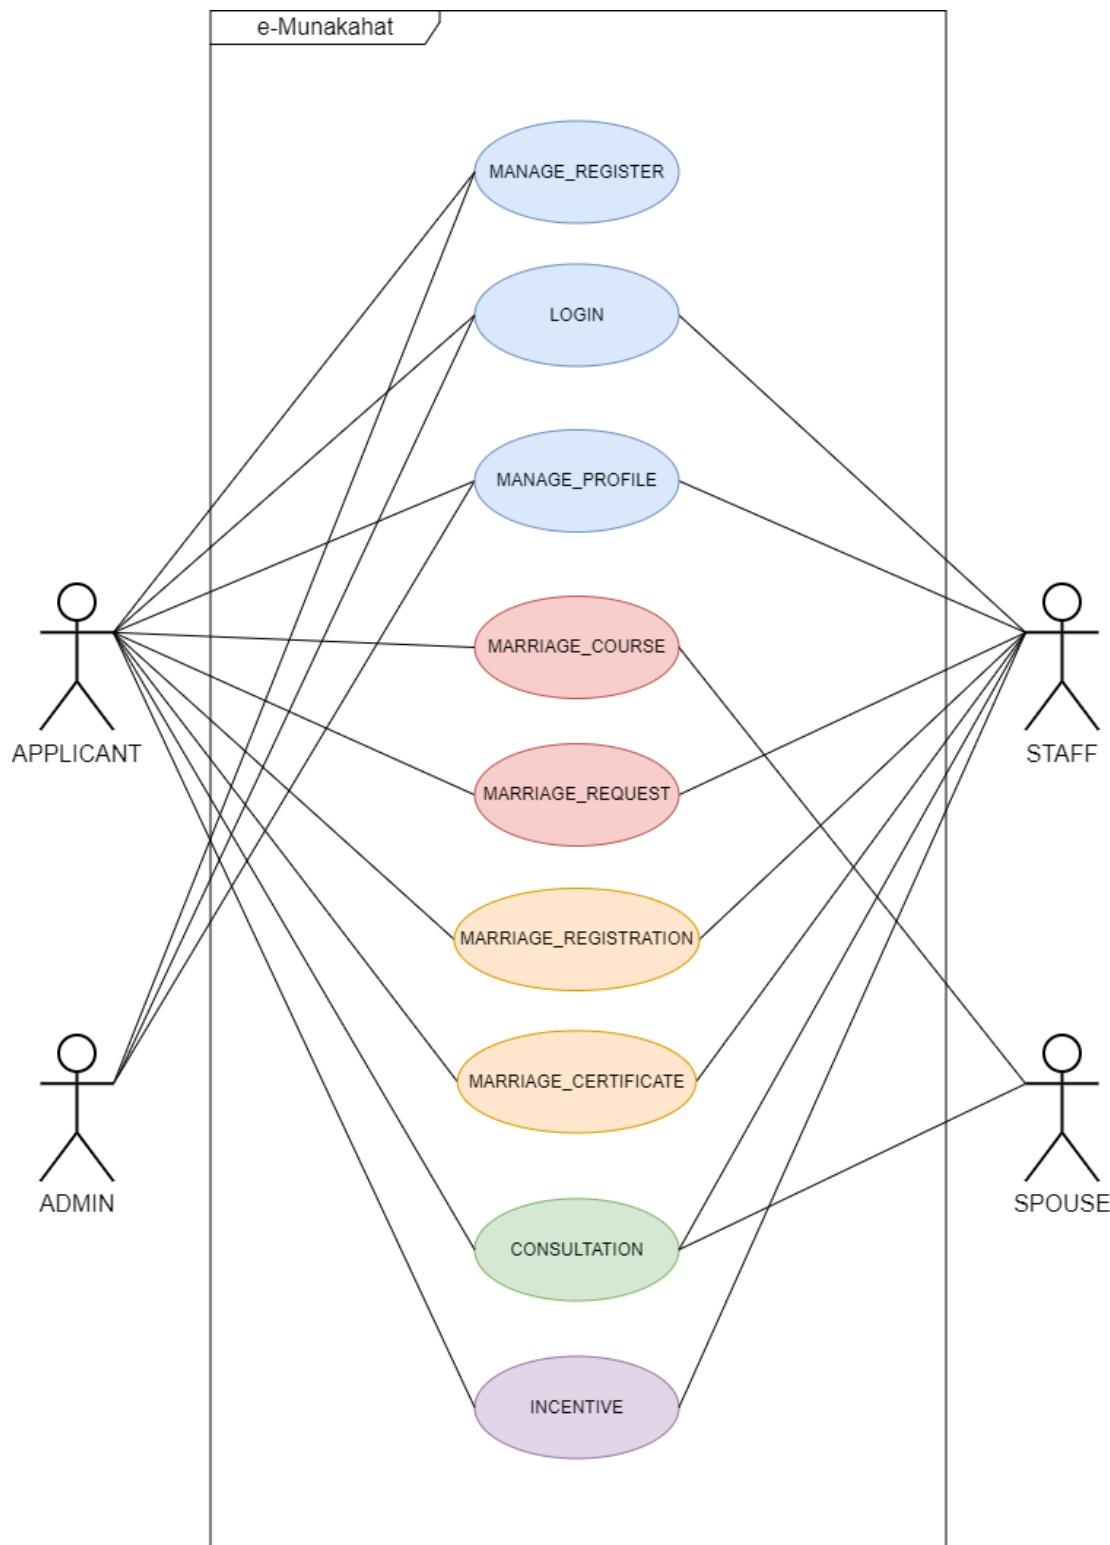

Figure 2.1.1 Use Case Diagram.

## 2.3 User Characteristics

User	Description	Age (years)	Educational Level	Background Experience
<b>APPLICANT</b>	Visitor of the website and end user who is applying for marriage through the system.	18 and above	No education required	<p>Must be:</p> <ul style="list-style-type: none"> <li>• Malaysian</li> <li>• Muslim</li> <li>• Resident of Pahang</li> </ul> <p>Able to:</p> <ul style="list-style-type: none"> <li>• Access the internet</li> <li>• Read and write in Bahasa Melayu</li> <li>• Use computer/smartphones</li> </ul>
<b>STAFF</b>	JAIP and PSG staff who are managing applicant information, documents, and applications.	26 to 60	Degree Graduate from managerial institute Computer related course	<p>Must be:</p> <ul style="list-style-type: none"> <li>• Malaysian</li> <li>• Muslim</li> <li>• Resident of Pahang</li> </ul> <p>Able to:</p> <ul style="list-style-type: none"> <li>• Access the internet</li> <li>• Use the computer</li> <li>• Read and write in Bahasa Melayu</li> <li>• Read and write in English Language</li> <li>• Identify documents authentic</li> </ul>
<b>SPOUSE</b>	Spouse information are entered by the applicant however the spouse will get email notification informing registration.	18 and above	No education required	<p>Able to access the internet Have a functioning email</p>
<b>ADMIN</b>	System administrator who manages the internal part of the system.	26 to 60	Degree Graduate from computer science institute	<p>Must be:</p> <ul style="list-style-type: none"> <li>• Malaysian</li> <li>• Muslim</li> </ul> <p>Able to:</p> <ul style="list-style-type: none"> <li>• Access all system features</li> <li>• Manage and maintain the system database files</li> <li>• Set up security policies for the system and users and keep them up to date</li> <li>• Perform system updates and maintenance</li> <li>• Maintain integrity and ethics</li> </ul>

### 3. SPECIFIC REQUIREMENTS

#### 3.1 Software Product Features

##### 3.1.1 Manage Register Use Case

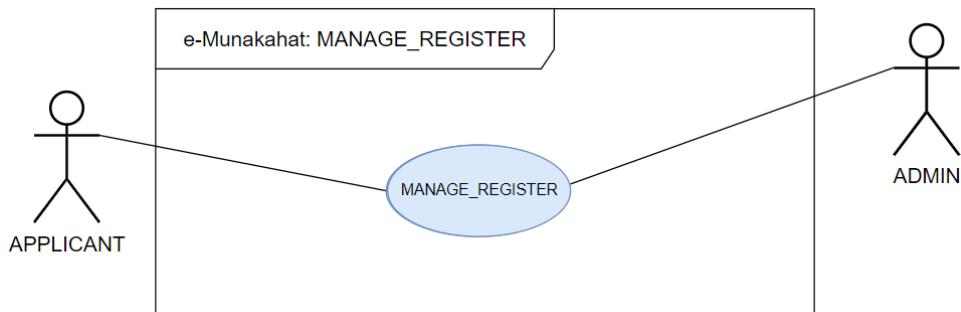

Figure 3.1.1 Manage Register Use Case Diagram.

Table 3.1 Manage Register Use Case Description

<b>Use Case ID</b>	UC101-EMUN-001
<b>Brief Description</b>	This use case describes the registration process by the applicant and admin who registers the staff.
<b>Actor</b>	Applicant and Admin
<b>Pre-Conditions</b>	1) The Applicant & Staff must be a Malaysian. 2) The Applicant & Staff must have a valid Identification Card number.
<b>Basic Flow</b>	<p>APPLICANT</p> <ol style="list-style-type: none"> <li>1. The applicant clicks on the register button.</li> <li>2. The system shows the registration form.</li> <li>3. The applicant fills in the registration details.</li> <li>4. The system validates the Identification Card number [E1: Identification Card number]</li> <li>5. The system validates the Password [E2: Password]</li> <li>6. The system validates the Email [E3: Email]</li> <li>7. The system validates the Identification Card number to ensure only 1 account is registered. [C1: Amount of applicant register]</li> <li>8. The system display registration status.</li> <li>9. The use case end.</li> </ol>

	<p><b>ADMIN</b></p> <ol style="list-style-type: none"> <li>1. The admin login into the system.</li> <li>2. The admin clicks on the register staff button.</li> <li>3. The system shows the staff registration form.</li> <li>4. The admin fills in the registration details.</li> <li>5. The system validates the Identification Card number [E1: Identification Card number]</li> <li>6. The system validates the Email [E3: Email ]</li> <li>7. The system validates the Identification Card number to ensure only 1 account is registered. [C1: Amount of applicant register]</li> <li>8. The system display registration status.</li> <li>9. The use case end.</li> </ol>
<b>Alternative Flow</b>	Not applicable
<b>Exception Flow</b>	<p>E1: Invalid Identification Card number</p> <ol style="list-style-type: none"> <li>1. The applicant or admin enters new identification card number according to required format and click confirm button.</li> <li>2. The system will validate the identification card.</li> <li>3. The use case continues with step 5 in (APPLICANT) basic flow or step 5 in (ADMIN) basic flow.</li> </ol> <p>E2: Invalid Password</p> <ol style="list-style-type: none"> <li>1. The applicant creates a new password according to required format and click confirm button.</li> <li>2. The system validates new created password.</li> <li>3. The use case continues with step 6 in (APPLICANT) basic flow.</li> </ol> <p>E3: Invalid Email</p> <ol style="list-style-type: none"> <li>1. The applicant enters a new email and click confirm button.</li> <li>2. The system validates new email.</li> <li>3. The use case continues with step 7 in (APPLICANT) basic flow or step 7 in (ADMIN) basic flow.</li> </ol>

<b>Post-Conditions</b>	The registration of the applicant is successfully done.
<b>Rules</b>	Not applicable
<b>Constraints</b>	C1: Amount to create account. Only 1 account registration for each of identification card for the applicant.
<b>Sequence Diagram</b>	Refer Appendix A-1.1: Sequence Diagram – Basic Flow A-1.2: Sequence Diagram – Basic Flow A-1.3: Sequence Diagram – Exception Flow A-1.4: Sequence Diagram – Exception Flow

### 3.1.2 Login Use Case

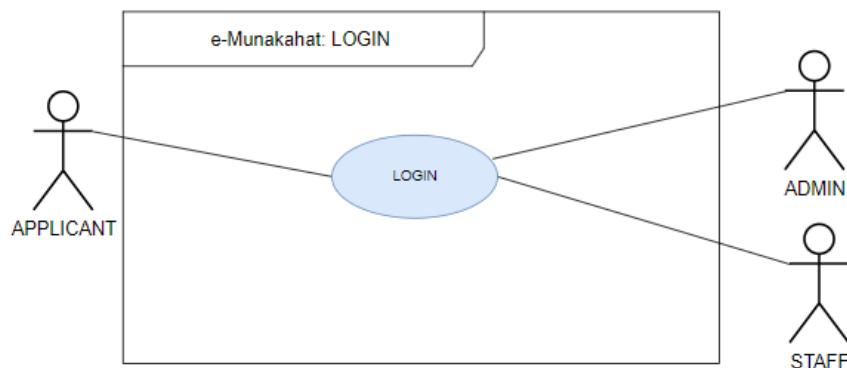

Figure 3.1.2 Login Use Case Diagram.

Table 3.2 Login Use Case Description.

<b>Use Case ID</b>	UC102-EMUN-001
<b>Brief Description</b>	This use case describes the login process for the applicant, staff & admin.
<b>Actor</b>	Applicant, Staff & Admin
<b>Pre-Conditions</b>	<ol style="list-style-type: none"> <li>1. The applicant must have a registered account.</li> <li>2. The staff must be registered by the admin.</li> </ol>
<b>Basic Flow</b>	<p>APPLICANT</p> <ol style="list-style-type: none"> <li>1. The system shows the login page.</li> <li>2. The applicant enters Identification Card number and password.</li> <li>3. The applicant clicks the login button.</li> <li>4. The system validates the identification card number [E1: Invalid Identification Card number]</li> <li>5. The system validates the password [E2: Invalid password]</li> <li>6. The applicant can click on forgot password. [A1: Forgot password]</li> <li>7. The use case end</li> </ol>

	<p><b>STAFF &amp; ADMIN</b></p> <ol style="list-style-type: none"> <li>1. The system shows the login page.</li> <li>2. The staff &amp; admin clicks on the staff login button.</li> <li>3. The system shows the staff login page.</li> <li>4. The staff &amp; admin enters their identification card number and password.</li> <li>5. The staff &amp; admin clicks the login button.</li> <li>6. The system validates the identification card number [E1: Invalid Identification Card number]</li> <li>7. The system validates the password [E2: Invalid password]</li> <li>8. The use case end</li> </ol>
<b>Alternative Flow</b>	<p>A1. Forgot password</p> <ol style="list-style-type: none"> <li>1. The applicant clicks on forgot password.</li> <li>2. The system will ask for email.</li> <li>3. After entering their email, the system will ask them to check their email to reset password.</li> <li>4. The applicant enters a new password and click the reset password.</li> <li>5. The use case continues with step 2 in (APPLICANT) basic flow.</li> </ol>
<b>Exception Flow</b>	<p>E1: Invalid Identification Card number</p> <ol style="list-style-type: none"> <li>1. The applicant and staff enter new identification card number according to required format.</li> <li>2. The system will validate the identification card.</li> <li>3. The use case continues with step 3 in (APPLICANT) basic flow and step 5 in (STAFF &amp; ADMIN) basic flow.</li> </ol> <p>E2: Invalid password</p> <ol style="list-style-type: none"> <li>1. The system displays login error.</li> <li>2. The applicant and staff need to re-enter password.</li> <li>3. The system verifies the password.</li> <li>4. The use case continues with step 3 in (APPLICANT) basic flow and step 5 in (STAFF) basic flow.</li> </ol>
<b>Post-Conditions</b>	The login for applicant, staff & admin successfully done.
<b>Rules</b>	Not applicable
<b>Constraints</b>	Not applicable
<b>Sequence Diagram</b>	<p>Refer Appendix</p> <p>A-2.1: Sequence Diagram – Basic Flow</p> <p>A-2.2: Sequence Diagram – Alternative Flow</p> <p>A-2.3: Sequence Diagram – Exception Flow</p>

### 3.1.3 Manage Profile

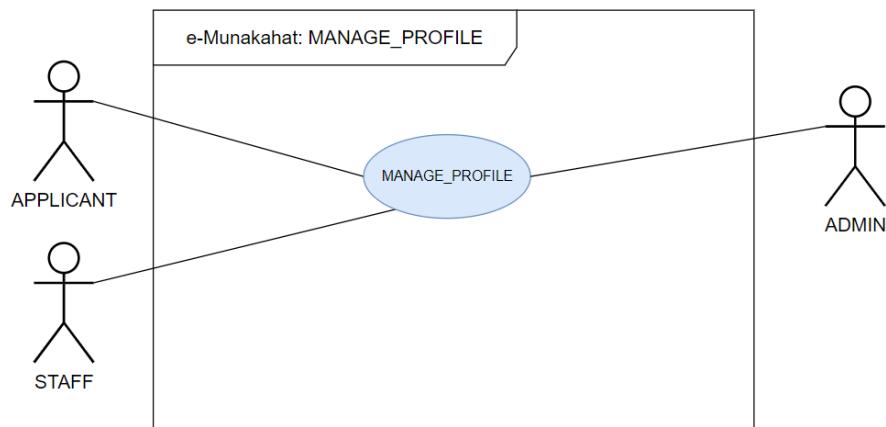

Figure 3.1.2 Manage Profile Use Case Diagram.

Table 3.3 Manage Profile Use Case Description.

<b>Use Case ID</b>	UC103-EMUN-001
<b>Brief Description</b>	This use case describes the applicant and staff to manage their own profiles and admin to update the staff and applicant profiles.
<b>Actor</b>	Applicant, staff, and admin
<b>Pre-Conditions</b>	<ol style="list-style-type: none"> <li>1. The applicant, staff &amp; admin must be logged in the system.</li> <li>2. The user chooses profile menu.</li> </ol>
<b>Basic Flow</b>	<p><b>APPLICANT</b></p> <ol style="list-style-type: none"> <li>1. The applicant clicks on the profile menu.</li> <li>2. The system displays the profile account page.</li> <li>3. The applicant can update their profile. [A1: Update profile]</li> <li>4. The applicant can change their password. [A2: Change Password]</li> <li>5. The use case ends.</li> </ol> <p><b>STAFF</b></p> <ol style="list-style-type: none"> <li>1. The staff clicks on the profile menu.</li> <li>2. The system displays the profile account page.</li> <li>3. The staff can update their profile. [A1: Update profile]</li> <li>4. The staff can change their password. [A2: Change Password]</li> <li>5. The use case ends.</li> </ol> <p><b>ADMIN</b></p> <ol style="list-style-type: none"> <li>1. The system display admin homepage.</li> <li>2. The admin can update staff [A3: Update Staff]</li> <li>3. The admin can update applicant [A4: Update Applicant]</li> <li>4. The use case end.</li> </ol>

<b>Alternative Flow</b>	<p><b>A1: Update profile</b></p> <ol style="list-style-type: none"> <li>1. The applicant and staff update their profile information.</li> <li>2. The applicant and staff click on the update button.</li> <li>3. The system displays profile successfully updated.</li> <li>4. The use case continues with step 2 in (APPLICANT) &amp; (STAFF) basic flow.</li> </ol> <p><b>A2: Change password</b></p> <ol style="list-style-type: none"> <li>1. The applicant and staff enter current password, new password and re-enter new password.</li> <li>2. The applicant and staff click on the change button.</li> <li>3. The system displays password successfully changed.</li> <li>4. The use case continues with step 2 in (APPLICANT) &amp; (STAFF) basic flow.</li> </ol> <p><b>A3: Update Staff</b></p> <ol style="list-style-type: none"> <li>1. The admin click on the update staff button.</li> <li>2. The admin search for staff using IC number.</li> <li>3. The system shows the name &amp; IC number of the staff.</li> <li>4. The admin click the edit button</li> <li>5. The admin update the staff's details.</li> <li>6. The admin click on the update button.</li> <li>7. The account information successfully updated.</li> <li>8. The use case continues with step 1 in (ADMIN) basic flow.</li> </ol> <p><b>A4: Update Applicant</b></p> <ol style="list-style-type: none"> <li>1. ### 3.2.1 User Interfaces

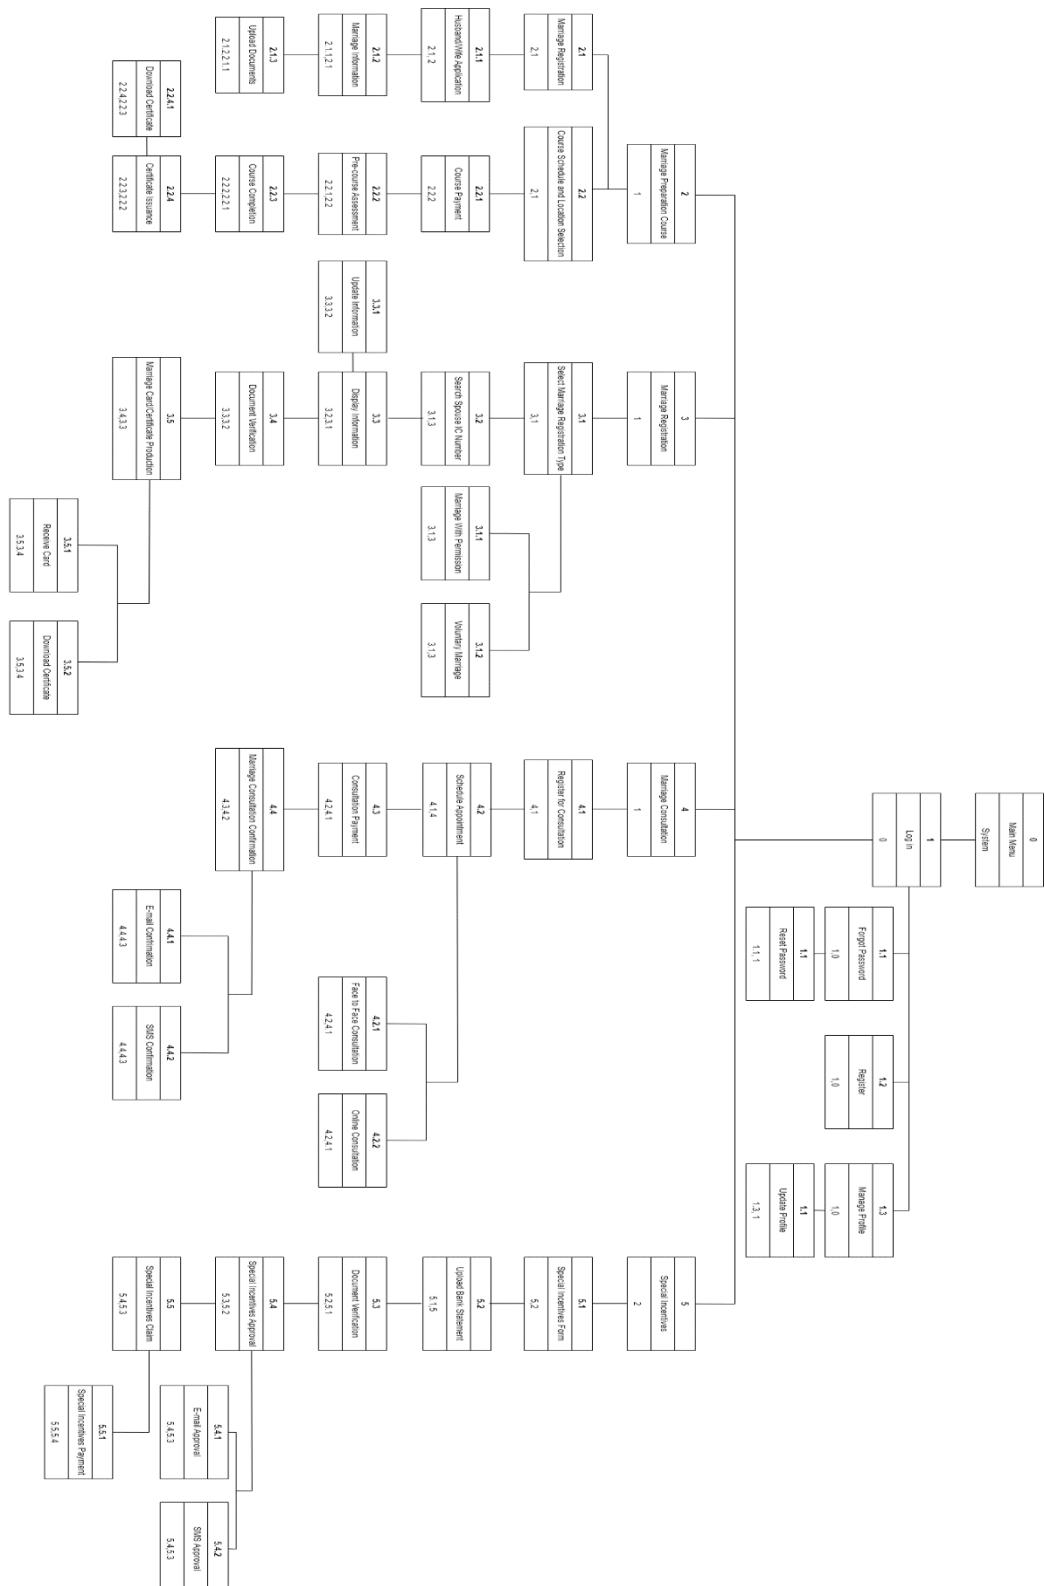

Figure 3.2.1 Dialogue Diagram

## SOFTWARE REQUIREMENT SPECIFICATION (SRS)

Table 4 User Interfaces Description

User Interface	Description	User Interface Layout
Main Page	The main page of the system will have a simple and clean design, with the title "e-Munakahat" prominently displayed, along with its logo. The navigation menu will include options for the user to select their desired service, such as marriage incentive, user guide, marriage, divorce, ruju', and advisor service. On the right side of the interface, users will have the option to log in using their IC number and password. There will also be a button to register as a new user and a button to log in as staff.	Refer Appendix B-1.1
Registration	The registration interface will have the e-Munakahat logo and name prominently displayed at the top of the page. Users will be prompted to enter their IC number, full name, gender, phone number, password, confirm password, and email address. The interface will have clean and simple design, with clear and easy-to-understand instructions for entering the required information. Users will be able to review their entries before clicking on the submit button, once the registration form is completed and submitted, users will receive a confirmation email and/or SMS that the registration was successful.	Refer Appendix B-1.2
Staff Login Page	The staff login interface will have the e-Munakahat logo and name prominently displayed at the top of the page. Admin & Staff members will be prompted to enter their IC number and password in order to log in. The interface will have a clean and simple design, with clear and easy-to-understand instructions for entering the required information. Once the staff member has entered their login credentials and clicked on the submit button, the system will check the credentials and if they match, the Admin & staff member will be logged in to their account.	Refer Appendix B-1.3
Forgot Password	The interface allows users to reset their password by entering their registered email address and sending a reset link. The interface includes a button to go back to the login page.	Refer Appendix B-1.4

## SOFTWARE REQUIREMENT SPECIFICATION (SRS)

Email Verification	The interface allows users to check the email address they have provided for the reset password link sent by the system. The interface will display a message to check the email for the reset link and an option to resend the email if the user did not receive it. Users will be able to click on the link in the email to be directed to the reset password page. There will also be a button to go back to the login page.	Refer Appendix B-1.5
Reset Password	The interface allows users to reset their password by entering a new password and confirming it by entering it again. The interface will have a clean and simple design, with clear and easy-to-understand instructions for entering the new password. There will also be a button labelled "Reset Password" for the user to confirm the password change. The interface will also include a button to go back to the login page. Once the user clicks on the "Reset Password" button, the password will be reset, and the user will be prompted to log in with the new password.	Refer Appendix B-1.6
Password Success Reset	The interface will display a message indicating that the password reset was successful and the user can now log in with the new password. The interface will have a clean and simple design, with clear and easy-to-understand instructions for the user. There will also be a button labelled "Login" for the user to navigate back to the login page, where they can enter their new password and log in to their account.	Refer Appendix B-1.7
User Profile View	The user profile interface will display all the personal information and credentials of the user such as name, IC number, email, phone number, and marital status. Users will have the option to edit their profile, change their password, and reset their password. The interface will have a clean and simple design, with clear and easy-to-understand instructions for the user. On the left side of the interface, users will have the option to access several services such as marriage application, marriage registration, referral application, complaints/advice service, copies of documents, documents correction and log out option. Users will also have the option to save the changes after updating their profile and/or password.	Refer Appendix B-1.8

## SOFTWARE REQUIREMENT SPECIFICATION (SRS)

Admin Homepage	The admin homepage will have a simple and clean design, with the e-Munakahat logo and name prominently displayed on the right side. On the left side, the interface will display the admin's ID, name, access level, and department. The navigation menu will include options for the admin to access and manage different services, such as register staff, marriage approval, nikah registration, divorce registration, advice service, copies of documents, document correction, and log out option. The homepage will also have a button labelled "Learn more" on the right side, that allows the admin to access the user guide of the system.	Refer Appendix B-1.9
Staff Registration	The staff registration interface will allow the admin to register new staff members to the system. The interface will have a clean and simple design, with clear and easy-to-understand instructions for entering the required information. The admin will be prompted to enter the staff member's IC number, full name, email, phone number, role, and gender. There will also be a button labelled "Register" for the admin to confirm the registration. Once the registration is complete, the admin will be able to view and manage the newly registered staff member in the system.	Refer Appendix B-2.0
Search Staff	The search staff interface allows the admin to search for staff to update by entering the IC number of the staff and clicking the search button. Then the system will display the name and IC number of the staff. There will be an option for the admin to edit, delete and print the staff beside the name.	Refer Appendix B-2.1
Update Staff	The update staff profile view interface will display the staff's personal information and credentials such as name, IC number, email, phone number, gender and system role. The admin can edit the staff profile. The interface will have a clean and simple design, with clear and easy-to-understand instructions for the admin. The admin will also have the option to save the changes after updating their profile.	Refer Appendix B-2.2

## SOFTWARE REQUIREMENT SPECIFICATION (SRS)

Search Applicant	The search applicant interface allows the admin to search for applicant to update by entering the IC number of the applicant and clicking the search button. Then the system will display the name and IC number of the applicant. There will be an option for the admin to edit, delete and print the applicant beside the name.	Refer Appendix B-2.3
Update Applicant	The update applicant profile view interface will display the applicant's personal information and credentials such as name, IC number, email, phone number and gender. The admin can edit the staff profile. The interface will have a clean and simple design, with clear and easy-to-understand instructions for the admin. The admin will also have the option to save the changes after updating their profile.	Refer Appendix B-2.4
Staff Homepage	The staff homepage will have a similar design and layout as the admin homepage, but with different options and functionality. On the left side, the interface will display the staff's ID, name, access level, and department. The navigation menu will include options for the staff to access and manage different services, such as marriage application, marriage registration, referral application, complaints/advice service, copies of documents, and log out option. The homepage will also have a button labelled "Learn more" on the right side, that allows the staff to access the user guide of the system. The staff will not have access to the same options as the admin, they will only be able to access the options that corresponds to their role.	Refer Appendix B-2.5
Staff Profile View	The staff profile view interface will display the staff member's personal information and credentials such as name, IC number, email, phone number, access level, and department. The staff will have the option to edit their profile and change their password. The interface will have a clean and simple design, with clear and easy-to-understand instructions for the staff member. The staff will also have the option to save the changes after updating their profile and/or password. The interface will also display the staff member's access level and the options that corresponds to their role.	Refer Appendix B-2.6

### **3.2.2 Hardware Interface**

Not applicable

### **3.2.3 Software Interface**

A web-based platform is used by the system administrator, JAIP staff, Applicant, Advisor and Consultant. For accessing this platform, these users need to use Windows or Mac operating systems. They open this system using web browsers such as Google Chrome, Microsoft Edge, Mozilla Firefox, and Apple's Safari.

## APPENDIX B

### User Interfaces

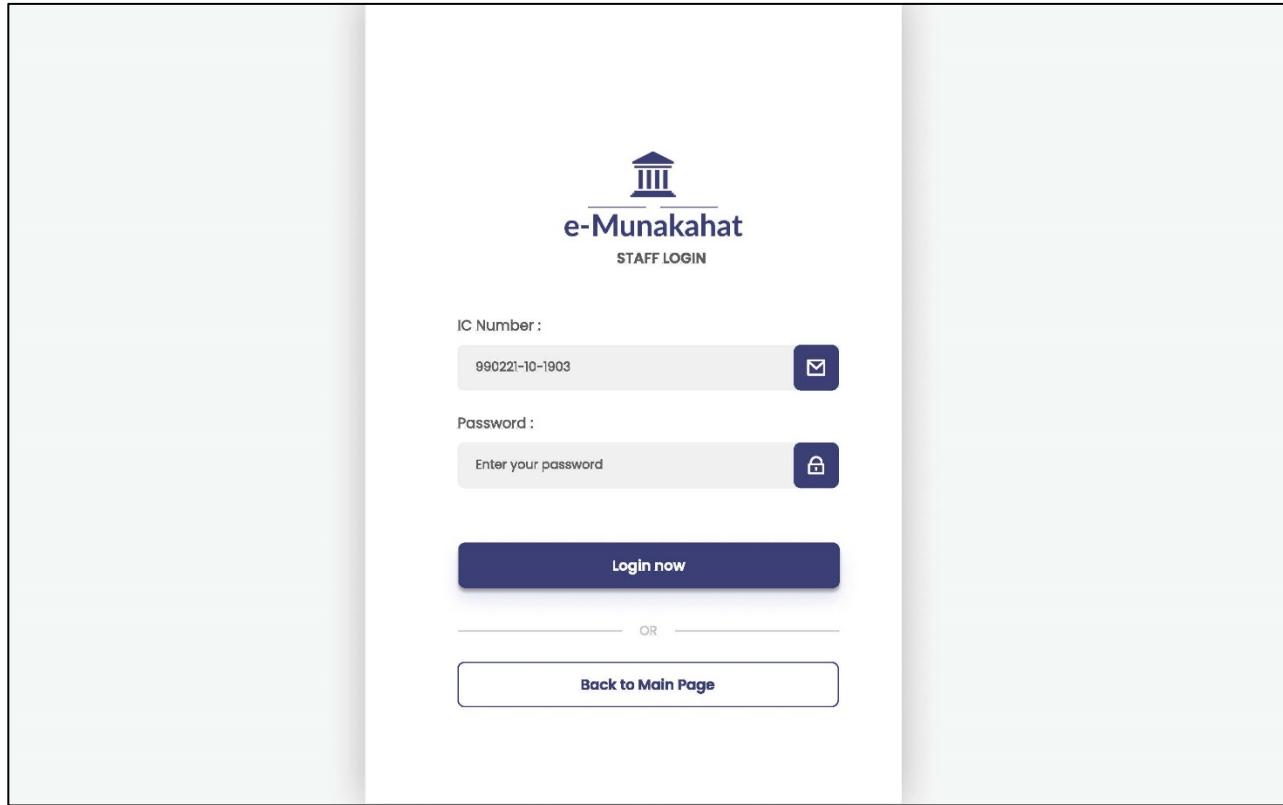

B-1.1: User Interface – Main Page Interface

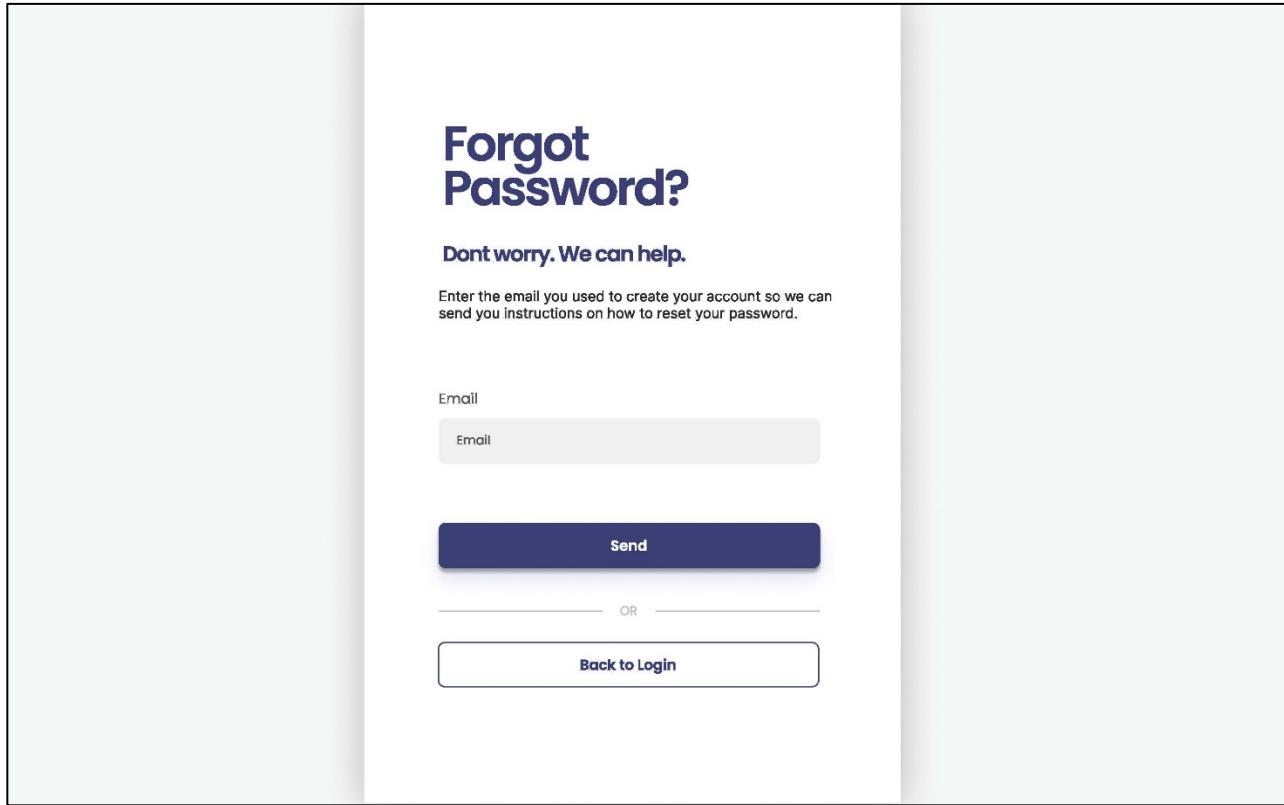

The image shows the registration interface for the e-Munakahat system. At the top center is a logo consisting of three vertical bars above the text "e-Munakahat". Below the logo is the text "Sign up into your account". The form fields are arranged in two columns. The left column contains: "IC Number :" with input field "990221-10-1903", "Gender :" with dropdown menu "select gender" and a downward arrow icon, "Password :" with input field "xxxxxxxxxx", and "Confirm Password :" with input field "xxxxxxxxxx". The right column contains: "Full Name :" with input field "Enter your name..", "Mobile No. :" with input field "+60 1932276", "Email Id :" with input field "info@xyz.com", and a large blue rounded rectangular button at the bottom labeled "Sign up".

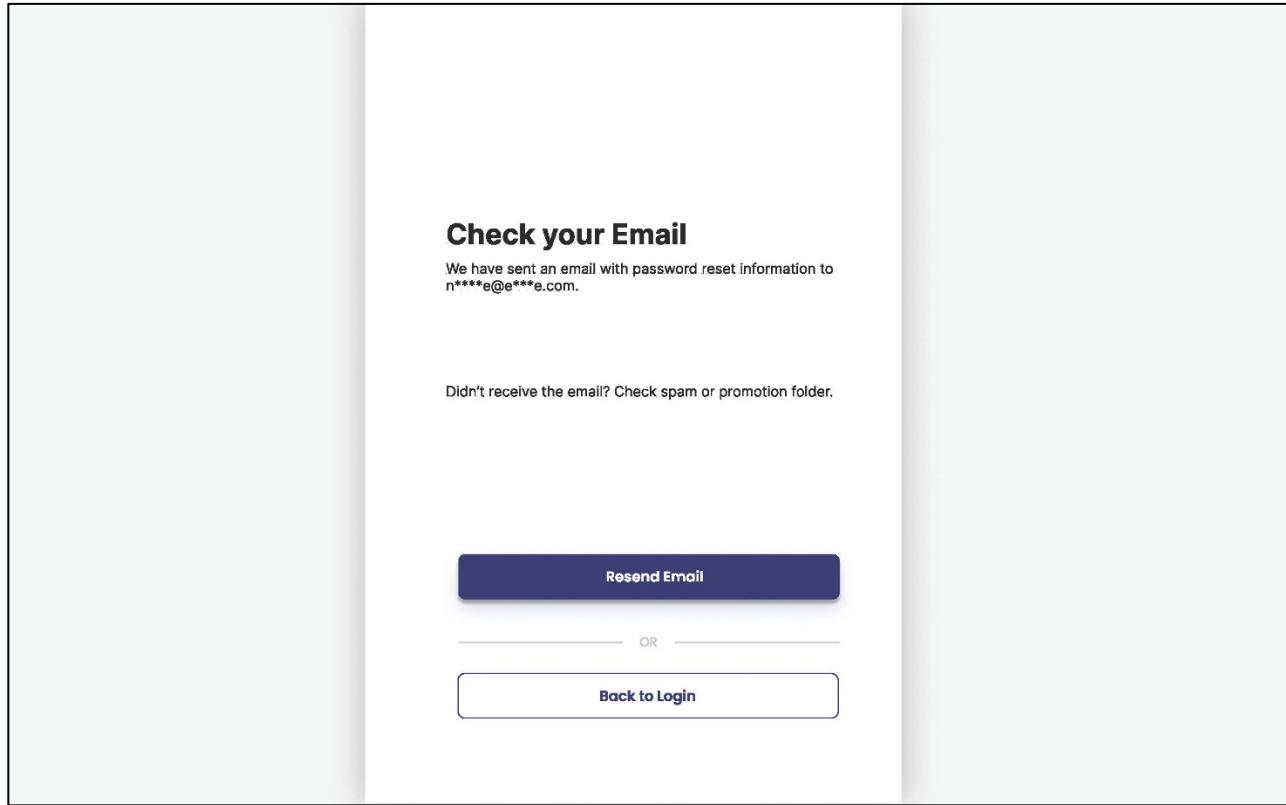

B-1.2: User Interface – Registration Interface

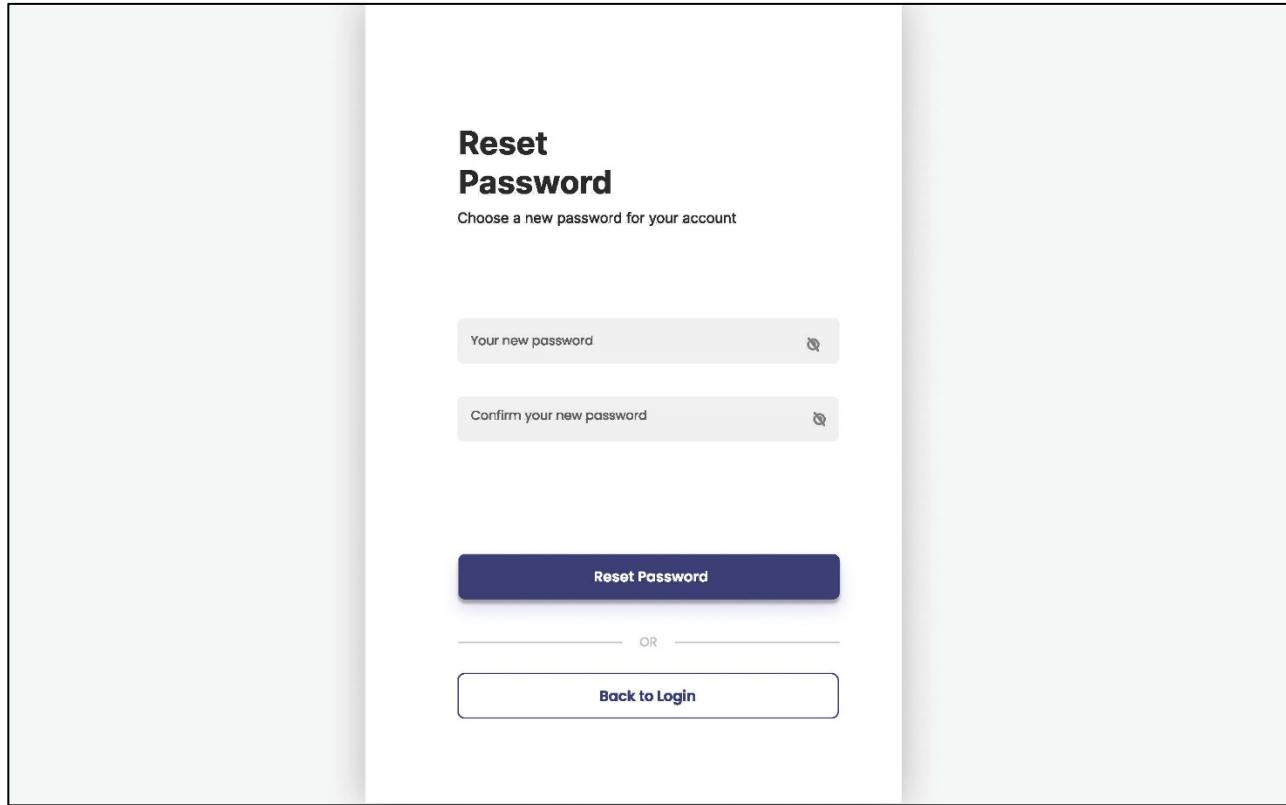

B-1.3: User Interface – Staff Login Interface

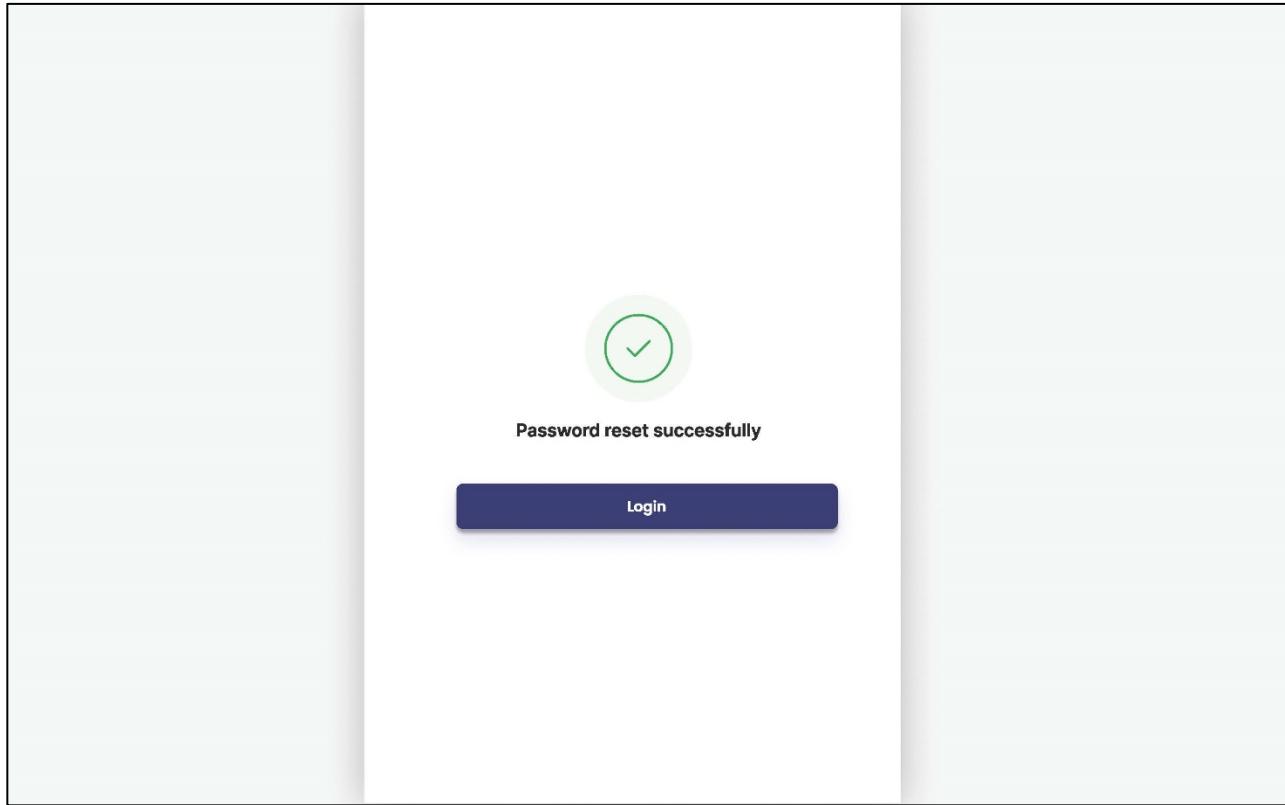

B-1.4: User Interface – Forgot Password Interface

B-1.5: User Interface – Email Verification Interface

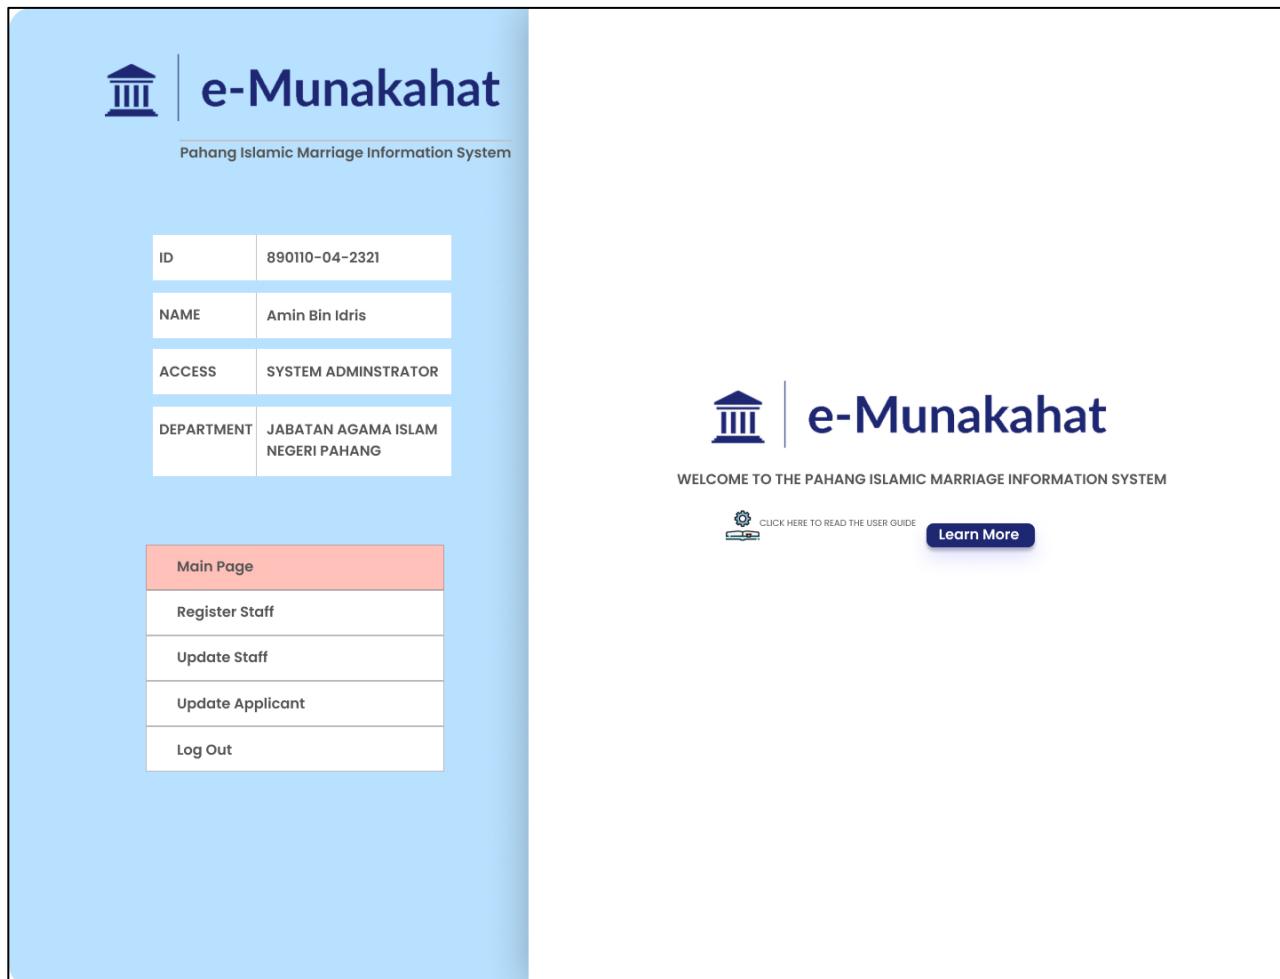

B-1.6: User Interface – Reset Password Interface

B-1.7: User Interface – Password Reset Successful Interface

The screenshot shows the user profile interface of the e-Munakahat system. On the left, there is a sidebar with a logo and a vertical menu containing links for Profile, Marriage Application, Marriage Registration, Referral Application, Complaints / Advice Service, Copies of Documents, Document Correction, and Log Out. The main content area has a dark blue header labeled 'Profile'. It contains several input fields: 'IC Number' with value '990221-10-1903', 'Phone Number' with value '0123456789', 'Gender' set to 'Male', 'Full Name' with value 'John Doe', 'Phone Number' with value '0123456789', 'Email Id' with value 'info@xyz.com', and a large 'Update' button. Below these, there are fields for 'Current Password' (with placeholder 'xxxxxxxxxx'), 'New Password' (with placeholder 'xxxxxxxxxx'), and 'Re-enter New Password' (with placeholder 'xxxxxxxxxx'). A 'Change Password' button is located at the bottom right of these fields.

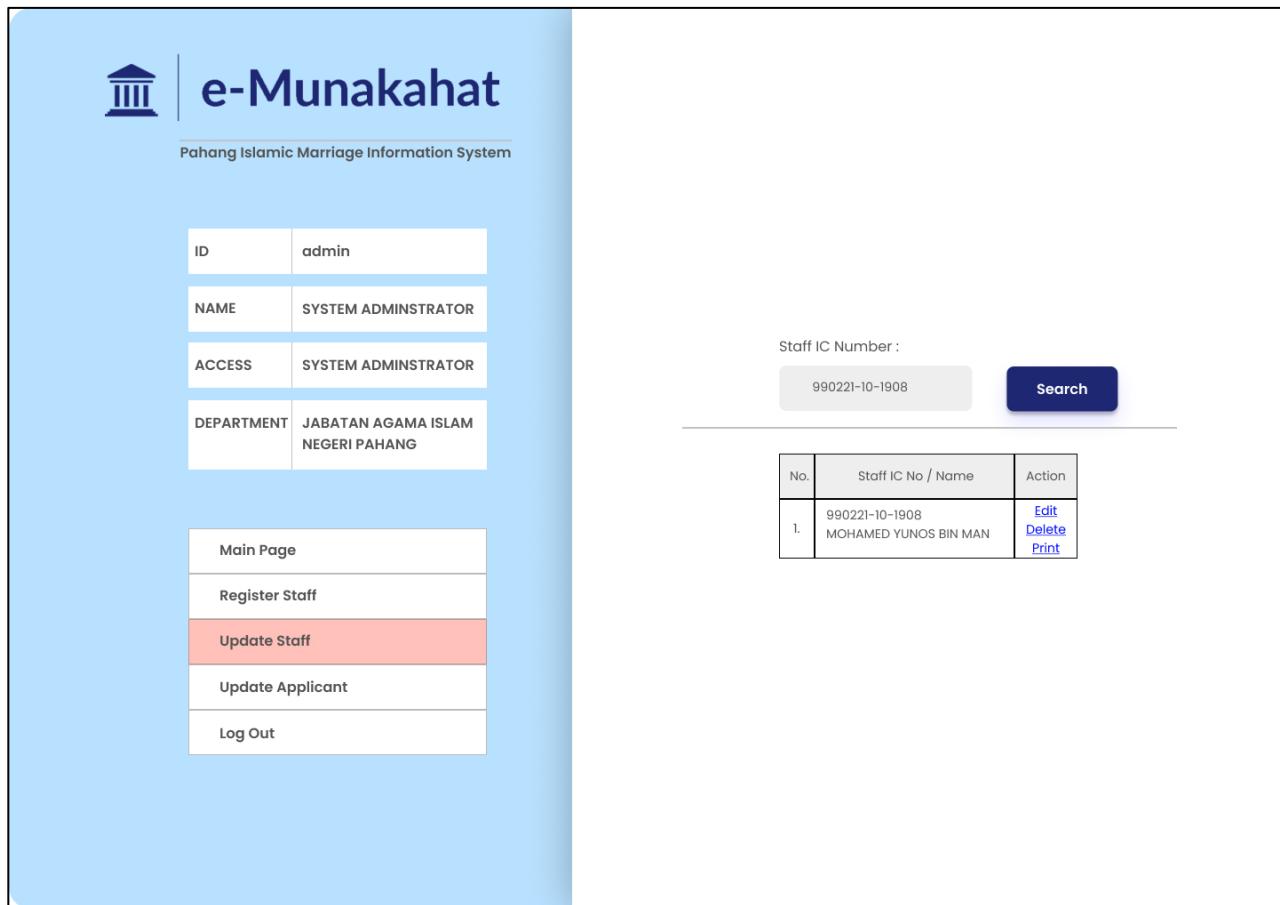

B-1.8: User Interface – User Profile Interface

B-1.9: User Interface – Admin Homepage Interface

The screenshot shows the 'e-Munakahat' user interface for staff registration. On the left, there's a sidebar with menu options: Main Page, Register Staff (which is highlighted in red), Update Staff, Update Applicant, and Log Out. The main area is titled 'REGISTER STAFF' and contains fields for IC Number (990221-10-1903), Full Name (Aiman), Email Id (info@xyz.com), Mobile No. (+60 19322763), Role (REGISTRATION STAFF), and Gender (MALE). Both role and gender have dropdown arrows indicating they are dropdown menus. A large blue 'REGISTER' button is at the bottom.

B-2.0: User Interface Staff Registration Interface

B-2.1: User Interface –Search Staff Interface

The screenshot displays the e-Munakahat application interface. On the left, a sidebar menu lists five options: Main Page, Register Staff, Update Staff, Update Applicant, and Log Out. The 'Update Staff' option is highlighted with a red background. The main content area shows a 'Staff Profile' form. The profile details are as follows:

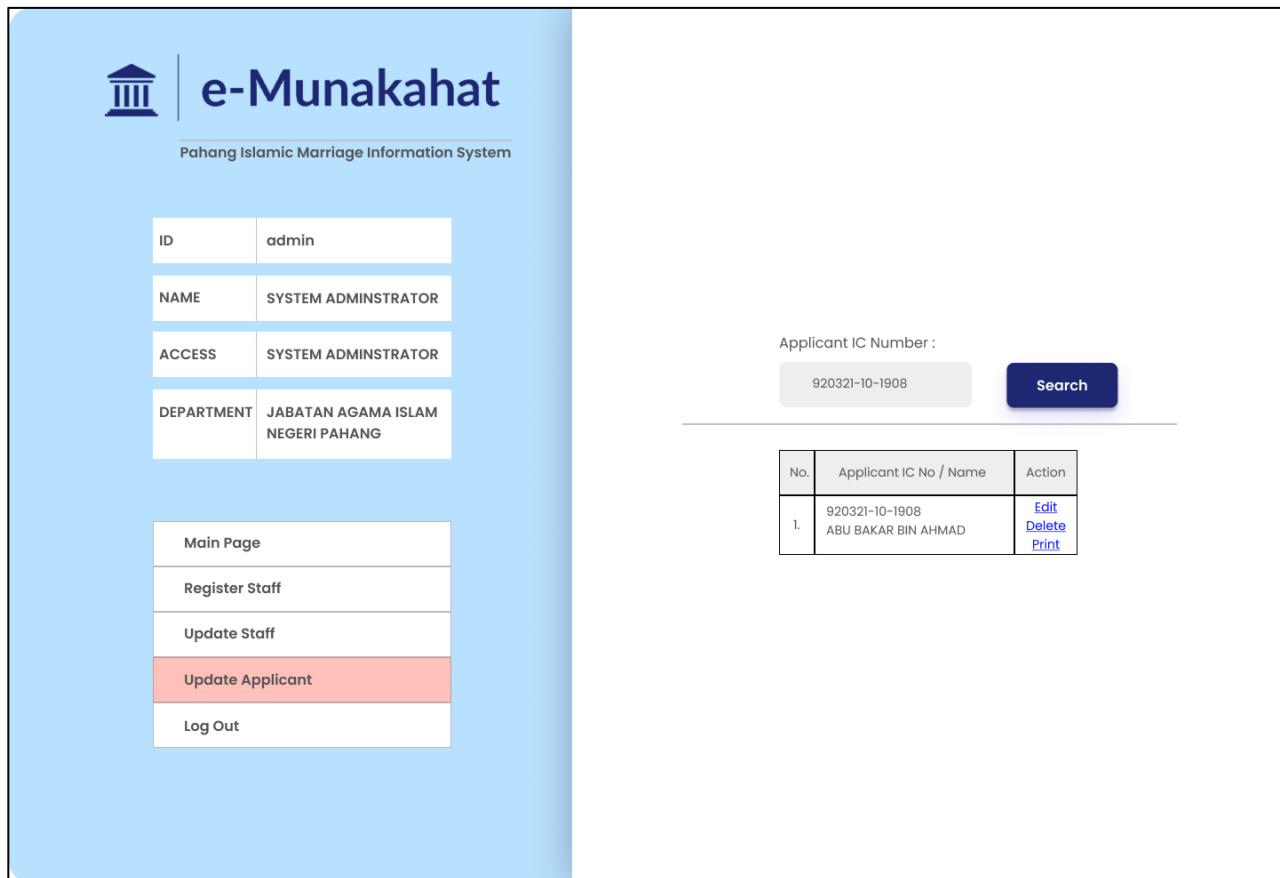

ID	admin
NAME	SYSTEM ADMINSTRATOR
ACCESS	SYSTEM ADMINSTRATOR
DEPARTMENT	JABATAN AGAMA ISLAM NEGERI PAHANG

The 'Update Staff' button in the sidebar has been clicked, opening the update form. The form fields are:

- IC Number : 990221-10-1908
- Phone Number : 0123456789
- Gender : MALE
- Full Name : MOHAMED YUNOS BIN MAN
- Email Id : info@xyz.com
- Role : REGISTRATION STAFF

A large blue 'Update' button is located at the bottom right of the form.

B-2.2: User Interface –Update Staff Interface

B-2.3: User Interface –Search Applicant Interface

The image shows two screenshots of the e-Munakahat application. The left screenshot displays the main dashboard for an administrator named 'admin' with access to 'SYSTEM ADMINISTRATOR'. The right screenshot shows the 'Applicant Profile' update form, which includes fields for IC Number, Phone Number, Gender, Full Name, and Email Id, along with an 'Update' button.

**Left Screenshot (Administrator Dashboard):**

ID	admin
NAME	SYSTEM ADMINISTRATOR
ACCESS	SYSTEM ADMINISTRATOR
DEPARTMENT	JABATAN AGAMA ISLAM NEGERI PAHANG

Main Page  
Register Staff  
Update Staff  
Update Applicant  
Log Out

**Right Screenshot (Applicant Profile Form):**

Applicant Profile

IC Number : 920321-10-1908

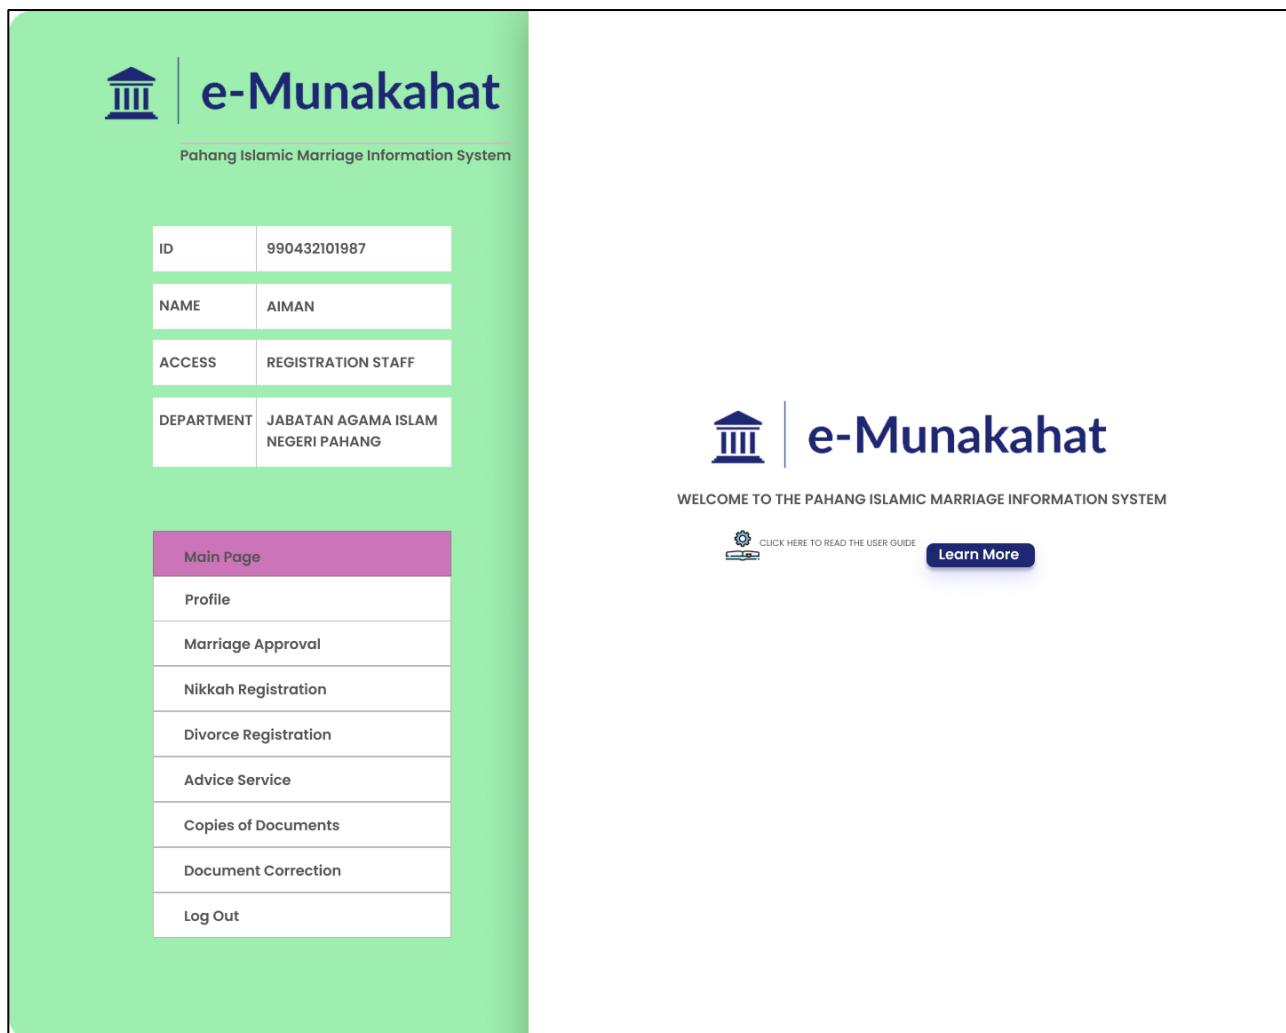

Phone Number : 0123456789 Gender : MALE

Full Name : ABU BAKAR BIN AHMAD

Email Id : info@xyz.com

## 1. INTRODUCTION

### 1.1 PURPOSE

The goal of this Software Requirements Specification (SRS) document is to provide a detailed description of the requirements for this e-Munakahat for the Jabatan Agama Islam Pahang (JAIP). The SRS paper will also include specifications for the E-Munakahat system. Furthermore, the SRS document explains the processes used to guarantee that each defined criterion is fully met and satisfied by the stakeholder. It describes the software in depth, as well as needs such as functional requirement and external interface requirements, as well as requirement traceability. This documentation also explains the characteristics of the users.

This paper is intended to serve as a reference for stakeholders and system developers during the system's installation and maintenance. It assists developers throughout the software development life cycle (SDLC) and will be submitted to clients and project managers for approval. Furthermore, it dictates how stakeholders perceive the system's functionality. The SRS paper can also serve as a resource for any designer or developer working on marriage-related software.

### 1.2 SYSTEM IDENTIFICATION

The Software Requirement Specification (SRS) belongs to the “e-Munakahat System” (EMS)

*Table 1.1 System Identification*

System title	e-Munakahat System
System abbreviation	EMS-2022
System identification number	SRS_BCS2233_EMС_2022
System version number	1.0.22 The initial release for the e-Munakahat System to the user.
System release number	1.0.23 Starting with number 1 at the major release shows that this system is initially released to the user. Number 23 at the service release show that this system is released in 2023.

### 1.3 SYSTEM OVERVIEW

As of now, marriage registration process that is used in Malaysia is still not done fully online. Some of the process still need to be conducted physically and are time consuming. With the growth of today's technology, these should not be happened anymore. Starting from marriage preparation course registration until the bride and groom get the marriage certificate, all the process must be done online.

e-Munakahat System is a system that allows users to do marriage registration specifically for Pahang people and manage all the processes online. There are four modules in this system which are:

The system must allow users to enter their identification number, name, gender, contact number, email, and password to register. The system must send an email of their password alert to the user after registration is done. After successfully login in, the user should be able to view and update their profile and their documents. The system must display all the needed columns on the profile page. The system must allow the admin and JAIP staff to login into their account by entering their identification number and password. The system shall enable admin and staff to view and manage users' marriage information and application. The system also shall enable admin and staff to give approval to the users' application.

After users register and login into the account, the users can proceed to the next step where they can apply for the marriage registration course. As a marriage registration course is an important step for the e-Munakahat system will update the name list of applicants. The system will show if the user has already paid for the course or not. So, then the staff can print the proof of payment and send the receipt to the applicants. The system shall allow the admin to manage the marriage preparation course details such as date, time, and where the course will be conducted. While the staff will handle the things that are related to the user or applicants. Approve the applications in the system and print the applicants' name list for the course for every session. If the applicant presents on the course day, the staff can approve their marriage course certificate. After the course ends, the applicants will be represented with the certificate. The staff can update the applicant's name from the system for obtaining the marriage course certificate.

After that is a module that allows users to register marriage within or outside the country and conduct a voluntary marriage. Besides that, it also produces a marriage card or certificate with payment proof. Users are required to choose marriage registration types like marriage with or without approval or voluntary marriage. Each type of marriage registration required a different supporting document. After users gather their supporting documents, users need to fill in personal details in the system. Next, the user can edit or delete before the data is submitted. Users also need to upload proof of payment and make sure all the personal information is correct and completed. After that, the marriage registration will be checked and approved by the JAIP administrator. After that, the user can apply for a marriage card but it needs another proof of payment for processing the card fee.

The Marriage Consultation service is a module that allows registered users to request consultation appointments with registered service advisors on matters related to marriage. Users

can choose their preferred time and service advisor and view their scheduled consultation appointment. Service advisors can manage all of their consultations and view their schedules. The system will also send notifications to both the service advisor and the user prior to the consultation. The service also has an administrative component, which allows an administrator to view and manage the consultations and users on the platform.

**1.4 REFERENCES**

*This section shall list the number, title, revision, and date of all documents referenced in this specification. This section shall also identify the source for all documents not available through normal Government stocking activities.*

## 2. PRODUCT DESCRIPTION

### 2.1 Product Perspective

The technology used to operate the e-Munakahat system is a web-based platform.

Figure 2.1 shows the context diagram of the e-Munakahat System. This figure shows the overall system function of the e-Munakahat system. This system has four entities which are JAIP staff, system admin, consultant and user which consists of Malaysian citizen that want to get married. Each entities have its contribution to this system as well as the system also.

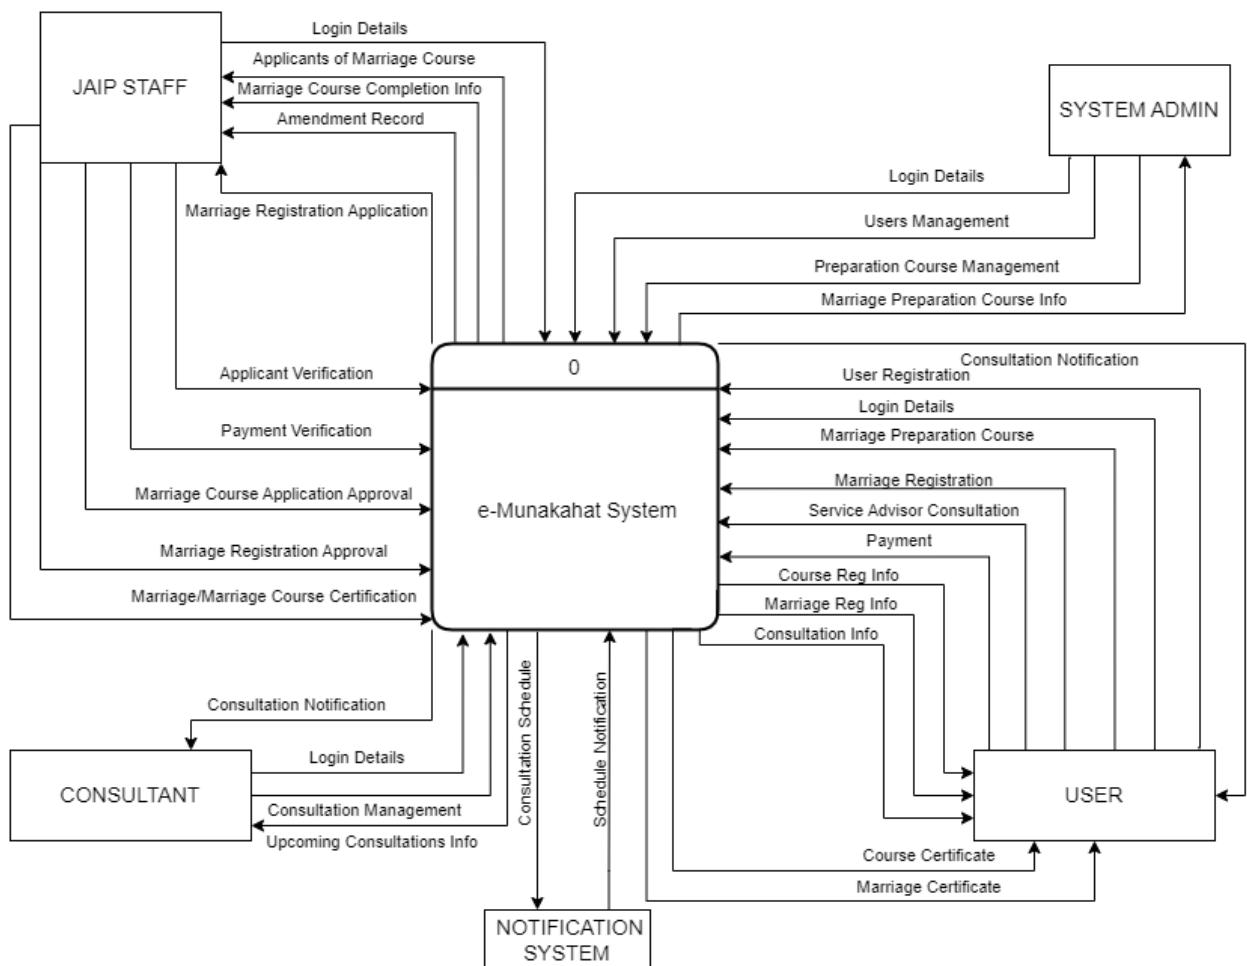

Figure 2.1: Context diagram

## 2.2 Product Functions

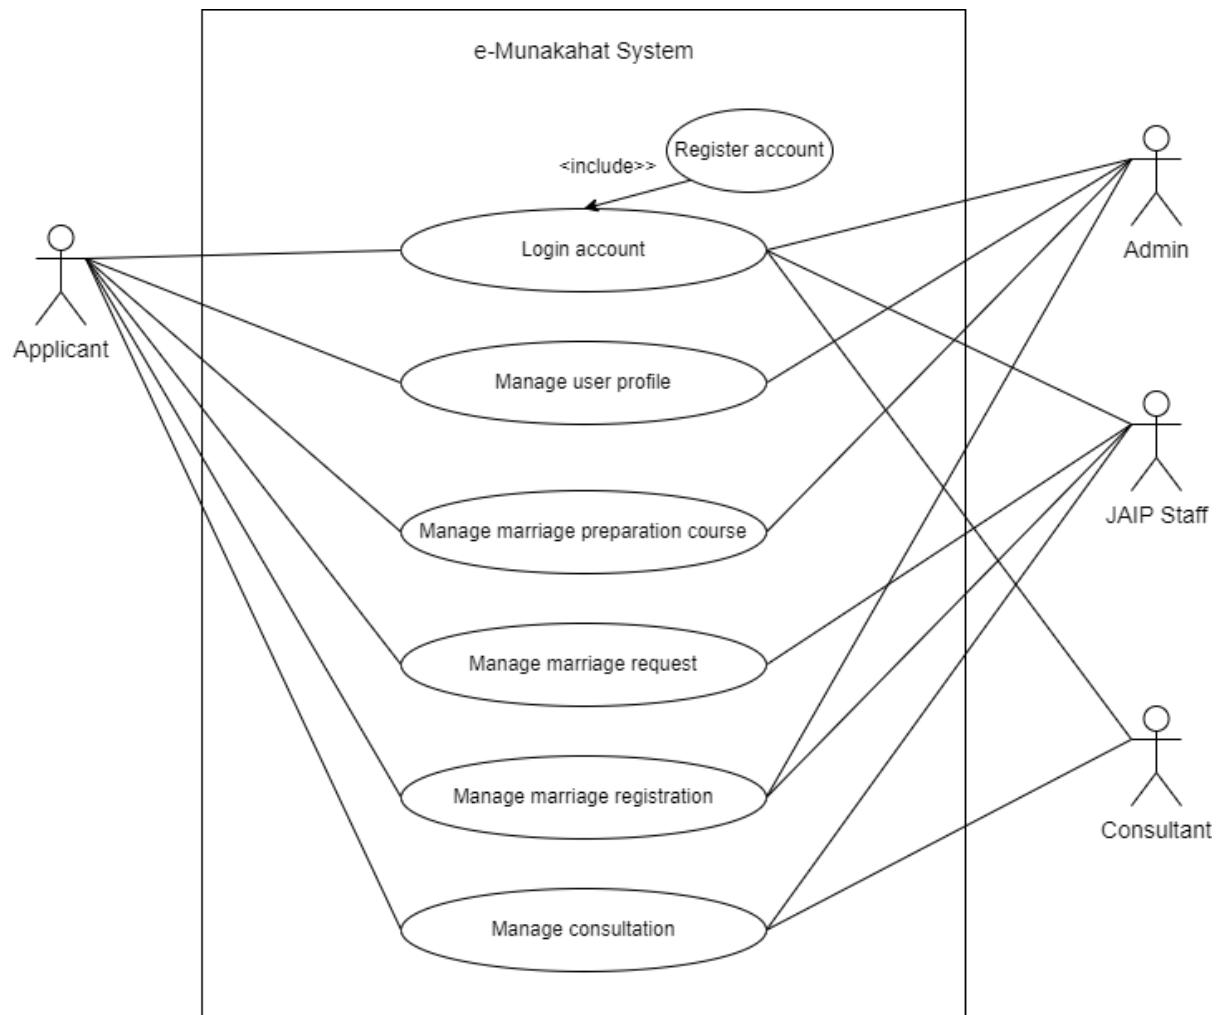

Figure 2.2 Use case diagram

### 2.3 User Characteristics

The e-Munakahat system has four main users which are applicant, JAIP staff, system administrator and consultant. Each of these users have different educational levels and background experiences.

*Table 2.1: User characteristics*

User	Educational Level / Age Restriction	Background Experience
Applicant (Malaysia citizen)	<p>Groom's age:</p> <ul style="list-style-type: none"> <li>• At least 18 years old and above.</li> </ul> <p>Bride's age:</p> <ul style="list-style-type: none"> <li>• At least 16 years old and above.</li> </ul>	Married couples where the groom alone has an income of RM5000.00 and below are eligible to receive incentives.
JAIP Staff	<p>Taking course that are related:</p> <ul style="list-style-type: none"> <li>• Undergraduate Level in Business Administration.</li> <li>• Undergraduate Level in HR.</li> <li>• Other relevant fields.</li> </ul> <p>Having requirements and skills:</p> <ul style="list-style-type: none"> <li>• Knowledge of administrative and HR practices.</li> <li>• Computer literacy (MS Office in particular).</li> <li>• Excellent organisational skills.</li> </ul>	<p>Able to:</p> <ul style="list-style-type: none"> <li>• Provide administrative support.</li> <li>• Organise work.</li> </ul>
JAIP Admin	<p>Taking course that are related to Computer Science:</p> <ul style="list-style-type: none"> <li>• Undergraduate Level</li> <li>• Postgraduate Level</li> </ul> <p>Having professional credentials certificates:</p> <ul style="list-style-type: none"> <li>• Microsoft Certified Solutions Engineer (MCSE)</li> <li>• Oracle Linux System Administrator (Oracle)</li> <li>• Red Hat Certified System Administrator (RHCSA)</li> <li>• Red Hat Certified Engineer (RHCE)</li> </ul>	<p>Able to:</p> <ul style="list-style-type: none"> <li>• Fixes system errors and troubleshoots problems as soon as possible.</li> <li>• Control user accounts, login information, storage allotments, access rights, and active directory administration.</li> <li>• Ensure high levels of efficiency and security.</li> <li>• Develop and execute a backup and recovery plan.</li> </ul>

	<ul style="list-style-type: none"> <li>• VMware Certified Professional 6- Data Center Virtualization</li> </ul>	
Consultant	<p>Having requirements and skills:</p> <ul style="list-style-type: none"> <li>• High school diploma.</li> <li>• Completion of an events planning or similar course.</li> <li>• Demonstrable experience as a wedding consultant.</li> <li>• Knowledgeable about pertinent regional vendors.</li> <li>• Imaginative disposition backed by brilliant logistical techniques.</li> <li>• Magnificent communication and collaboration abilities.</li> <li>• Outstanding conciliation techniques.</li> <li>• Capacity to actualize clients' creative visions.</li> </ul>	<p>Able to:</p> <ul style="list-style-type: none"> <li>• Provide support and guidance to couples.</li> <li>• Find the roots of troubles and conflicts.</li> <li>• Make strategies with the conflict areas and reduce or negate altogether.</li> <li>• Provide a safe place for the couple to discuss their issues.</li> <li>• Provide a short term outlet to the couples who need to discuss a specific issue.</li> </ul>

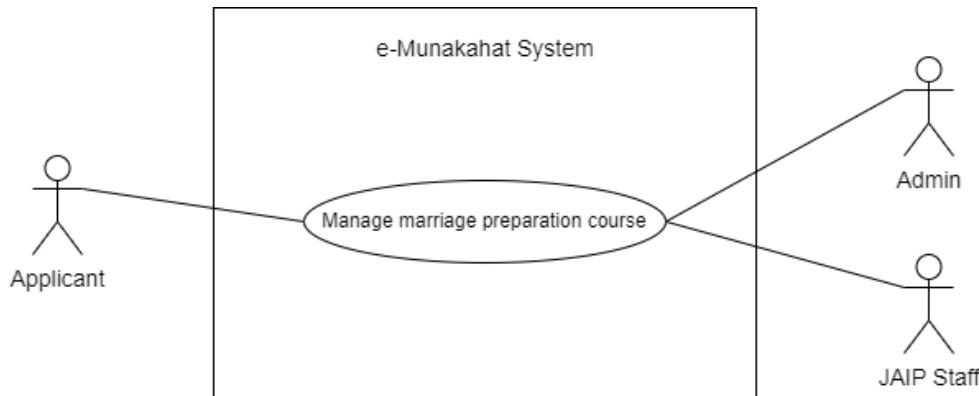

### 3. SPECIFIC REQUIREMENTS

---

#### 3.1 Software Product Features

### 3.1.2 Marriage Preparation Course

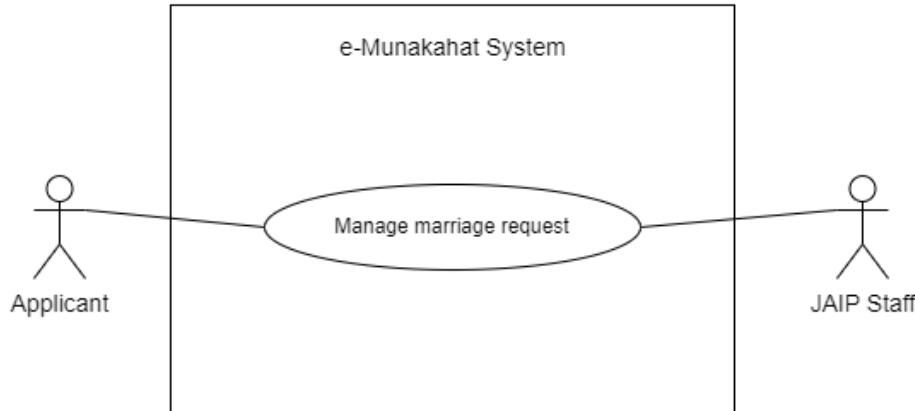

<b>Use Case ID</b>	UC200-EMS-2023
<b>Brief Description</b>	This use case was used by Pahang applicants to register for their marriage preparation course with their respective partners and attend the marriage preparation course to get the certificate.
<b>Actor</b>	Applicant, Admin and JAIP Staff.
<b>Pre-Conditions</b>	Applicants must click on the pre-marriage course application link.
<b>Basic Flow</b>	<p>Admin</p> <ol style="list-style-type: none"> <li>1. The use case starts when the admin wants to update the information in main interface.</li> <li>2. ### 3.2 External Interface Requirements

#### 3.2.1 User Interfaces

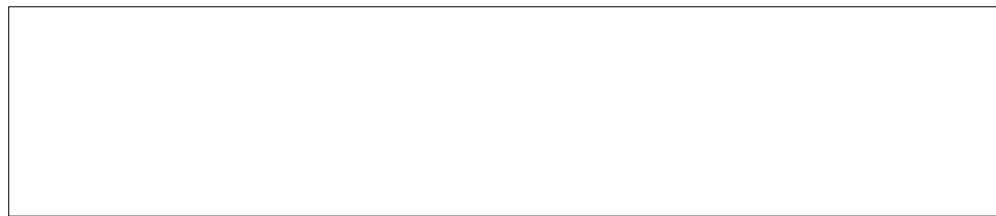

Figure 3.3: Dialogue Diagram

Table 3.3: User Interfaces Description

User Interface Name or Number	Description	User Interface Layout
Marriage Course Interface	The applicants shall register to attend the pre-marriage course.	Refer Appendix B.1.0
Marriage Request Interface	The applicants must get the pre-marriage course certificate before apply request marriage.	Refer Appendix B.2.0
Admin Manage Marriage Course Interface	The admins will manage the date, capacity and place where the course will be held in the system.	Refer Appendix B.1.1
JAIP Staff Manage Marriage Course Interface	The JAIP staff will handle the participants and give out the certificate after the course.	Refer Appendix B.1.2
JAIP Staff Manage Marriage Request Interface	The JAIP staff will handle the applicants document approval.	Refer Appendix B.2.1

#### 3.2.2 Hardware Interface

Not applicable.

#### 3.2.3 Software Interface

Web-based platform.

The applicant, admin, and JAIP staff all use a web-based platform. These webs can be accessed on many platforms of web browsers such as Amazon Silk, Apple Safari, Google Chrome, Microsoft Edge, Mozilla Firefox and so on. The users must utilize Microsoft Windows, Google's Android Operating System, Apple Mac Operating System, Apple IOS and Linux Operating System to evaluate this platform.

## 4. REQUIREMENT TRACEABILITY

Table 4.1 Requirement Traceability for Marriage Preparation Course.

Requirements	Description
UC200-EMS-2023	<b>Manage marriage preparation course</b> Enable applicants to register marriage preparation course.
UC201-EMS-2023	<b>Participation register</b> The applicants choose the venue to attend the course and the available date.
UC202-EMS-2023	<b>Print the application slip</b> The applicants enable to print the application slip after attending the marriage course.
UC203-EMS-2023	<b>Register Now</b> Enable applicants to register their names to book their place for the marriage course.
UC204-EMS-2023	<b>Capacity Full</b> Enable applicants to change the place where the course took to where there is availability.
UC205-EMS-2023	<b>Change the date</b> Enable applicants to change dates based on the place's capacity.
UC206-EMS-2023	<b>Print new certificate</b> Enable JAIP staff to print a new certificate when there is an error on the certificate.

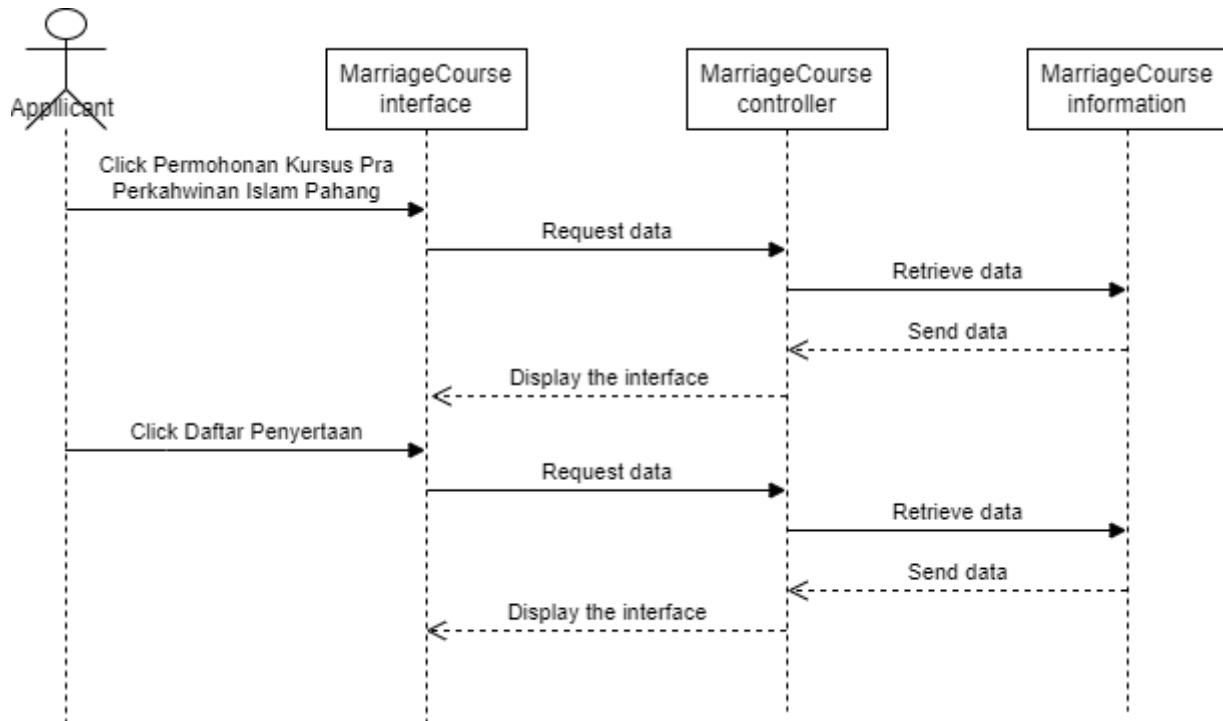

Table 4.2 Requirement Traceability for Use Case Marriage Request.

Requirements	Description
UC300-EMS-2023	<b>Manage marriage request</b> Enable applicants to request marriage.
UC301-EMS-2023	<b>Valid Identification Card</b> The system verifies that the input identification card number indeed has been already stored in the system.

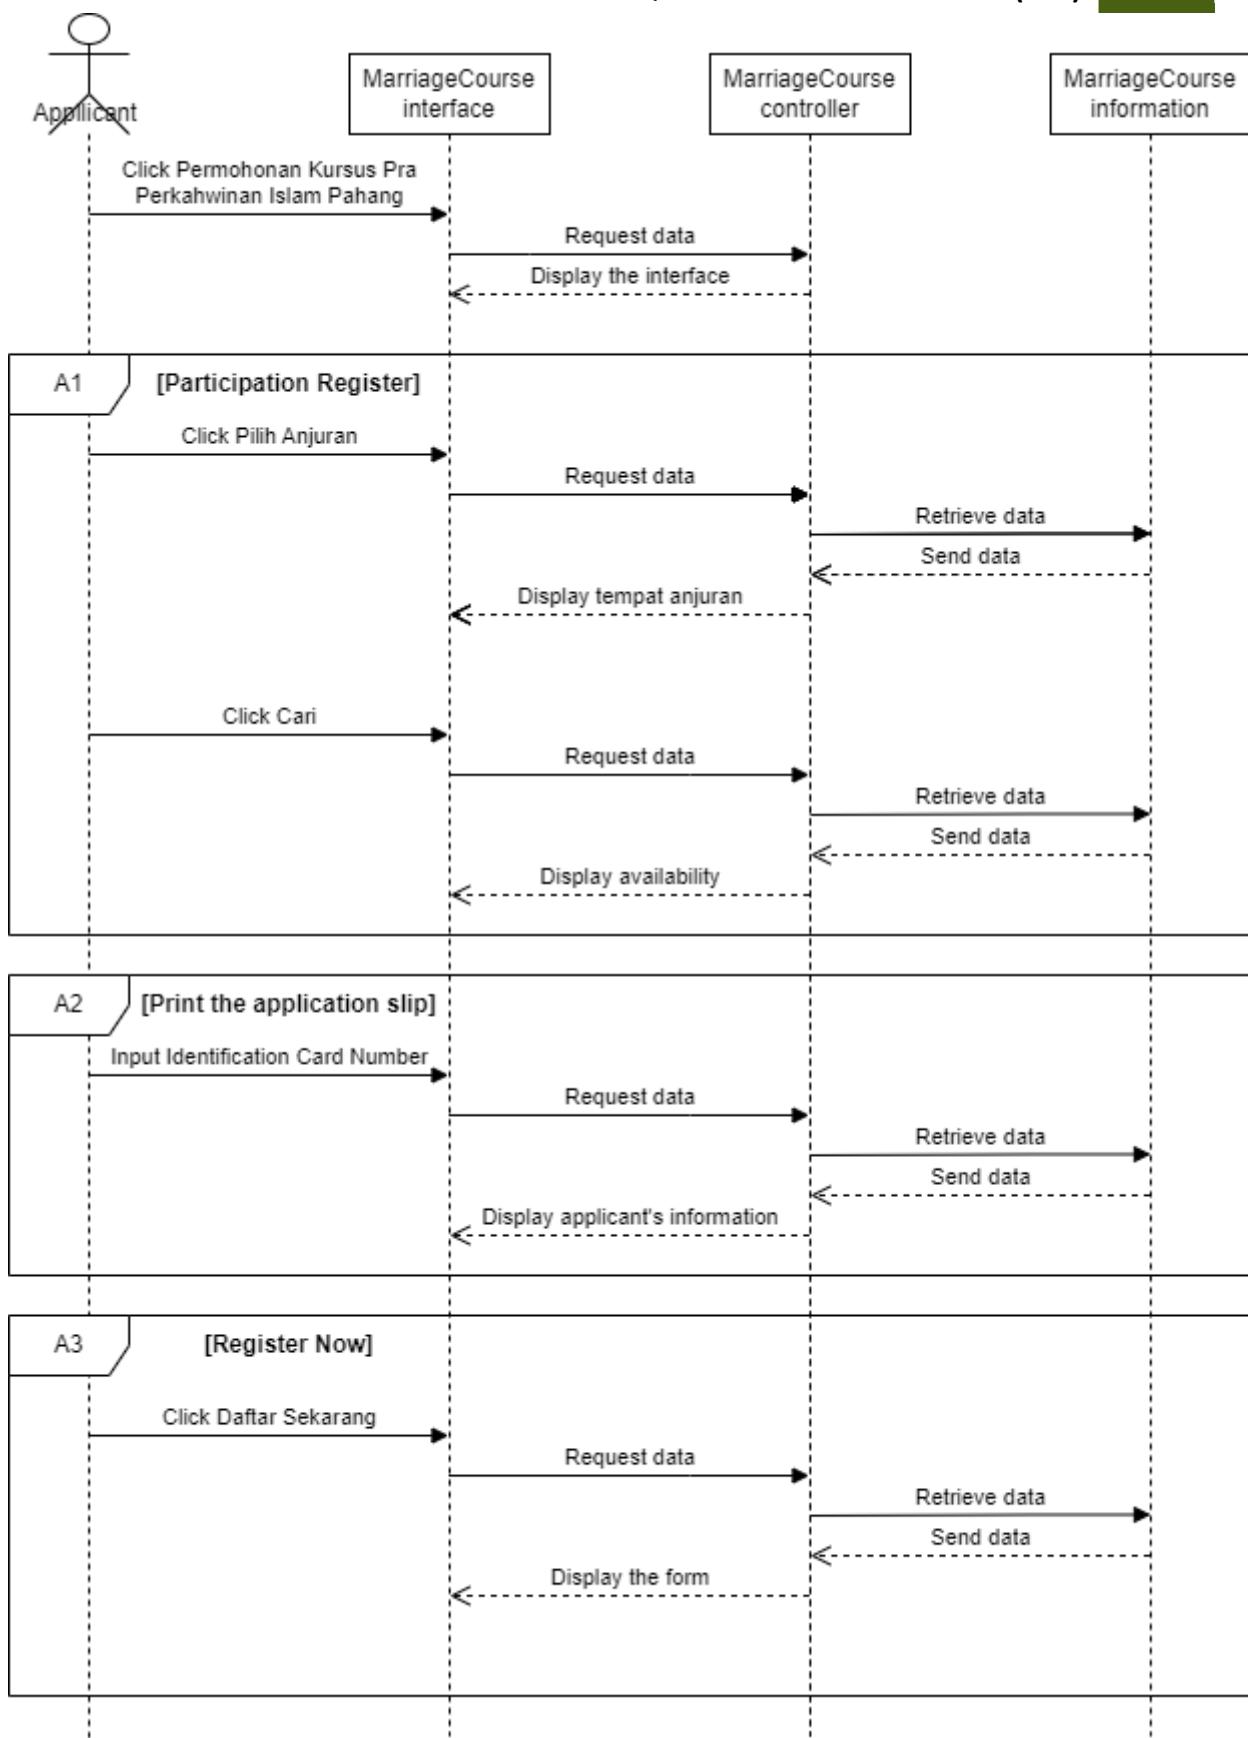

UC302-EMS-2023	<b>Invalid Identification Card</b>  The system checks the applicant's identification card number whether it matches the identification card number that is already been stored in the system.
UC303-EMS-2023	<b>Cannot make an amendment</b>  To ensure that the applicants cannot make any changes after the document has been sent to the PAID.

## 5. ACRONYMS AND ABBREVIATION

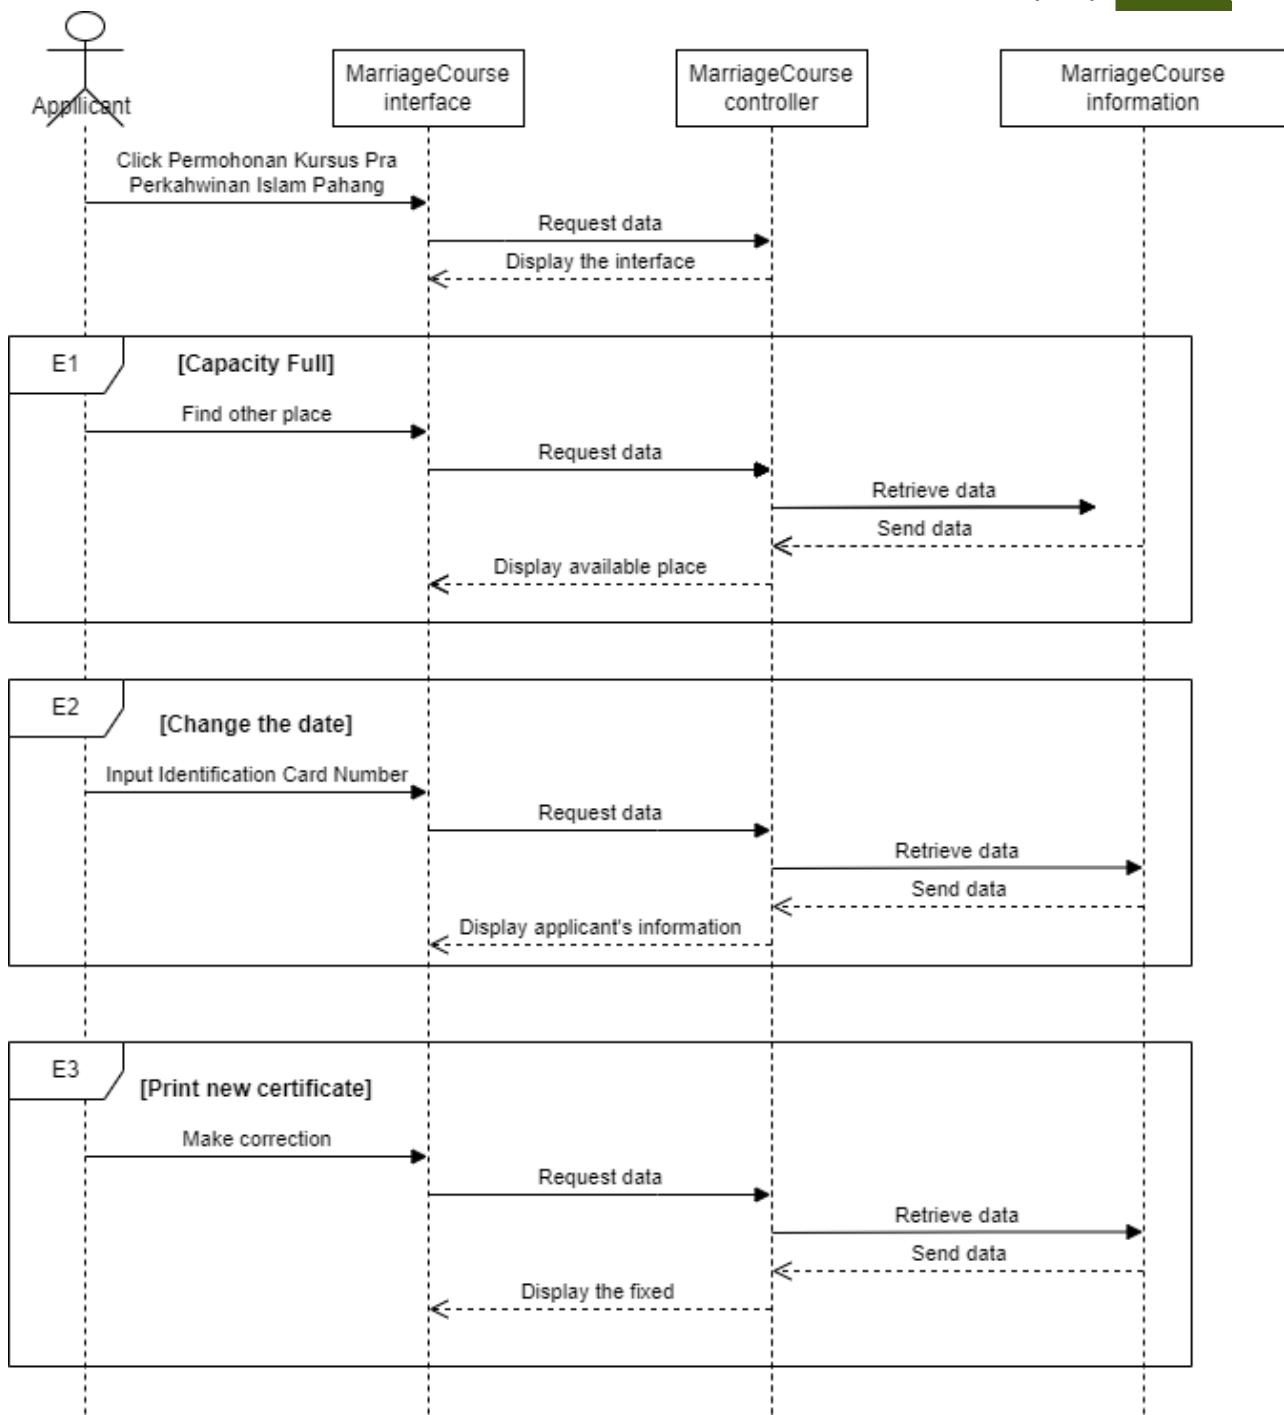

*This subsection should provide the definitions of all terms, acronyms, and abbreviations required to properly interpret the SRS. This information may be provided by reference to one or more appendixes in the SRS or by reference to other documents.*

# SRS Document:

# By Module

## 1. Student and Module Information

Name	CHUA KIAN PHENG		
Matric ID	CB21106	Section No.	04A
Group No.	5	Module No.	4
Module Description	<p>This module manage marriage consultation that is concentrated in registering for a marriage consultation with a service advisor. This module allows users to consult and seek help regarding their marital problems. Users can view or create new consultations. As for new consultation, users have to choose the purpose of the consultation and enter the details such as partner's information, marriage, divorce and the consultation's explanations. Users can then save and edit as long as they haven't submitted the consultation form. Consultation requests will be viewed by JAIP administrators and for every application made, JAIP administrators will assign a counselor to handle the consultation session. The applicant will be able to view the consulting details and date afterwards.</p>		

## 2. Use Case Description

Use Case ID	SRS-REQ-400
Brief Description	This use case allows the user to apply for consultation.
Actor	Future brides and grooms
Pre-condition	1. The future brides and grooms have logged into the system.

<b>Basic Flow</b>	<p><b>Brides and grooms</b></p> <ol style="list-style-type: none"> <li>1. The use case starts when the future brides and grooms click &lt;&gt;Aduan/Nasihat&gt;&gt; to enter the consultation's interface.</li> <li>2. The brides and grooms enter the spouse's IC number.</li> <li>3. The brides and grooms click the &lt;&gt;SEMAK&gt;&gt; button to check the entered IC number's record. <b>[R1: The identification card number's length is not valid]</b></li> <li>4. The e-Munakahat system will then display the record of entered IC number if any.</li> <li>5. The brides and grooms click &lt;&gt;Daftar Baru&gt;&gt; to apply for a new consultation if there is no record in the system.</li> <li>6. The brides and grooms enter all the required information <b>[E1: The information is not completed]</b></li> <li>7. The brides and grooms click &lt;&gt;SIMPAN&gt;&gt; to store all the entered data.</li> <li>8. The brides and grooms click &lt;&gt;KEMBALI&gt;&gt; to view the current application status.</li> <li>9. The e-Munakahat system will then display the status of the application made as "BARU".</li> <li>10. The brides and grooms click &lt;&gt;Hantar Permohonan&gt;&gt;</li> <li>11. The e-Munakahat system will display all the entered information as confirmation before being submitted. The brides and groom are able to perform these operations before submit:             <ol style="list-style-type: none"> <li>1. Print the application. <b>[A1: Print Application]</b></li> <li>2. Delete existing record. <b>[A2: Delete Record]</b></li> <li>3. Update and submit information. <b>[A3: Update information]</b></li> </ol> </li> <li>12. The brides and grooms click &lt;&gt;HANTAR&gt;&gt; to submit the application.</li> <li>13. ## By Module

### 1. Student and Module Information

Name	SHAMMENE MUNEEVARAN		
Matric ID	CB21018	Section No.	04/A
Group No.	5	Module No.	5
Module Description	<p>module five is to manage incentives that are about application for special incentives for the bride and groom if they are eligible. Users can check their eligibility for the special incentives by entering their identity card number, salary, and city. Users will be notified by displaying a message if they are eligible for the incentives and continue their application. Users can fill in and submit the "Borang Khas Pasangan Pengantin" form which includes a number, Akad Nikah Paper, bank statement details, and a letter from their working company. In addition, users can cancel and upload their document as long as it is in an unsubmitted status. JAIP administrators will receive the form and decide on the application. Users will be able to view the application status and if the application is approved, users can view incentive details in the report.</p>		

### 2. Use Case Description

<b>Use Case ID</b>	SRS-UC-500
